## **MYEG PHILIPPINES ROLLS OUT CONTACT TRACING AND HEALTH PROFILING APP FOR CITIES IN PHILIPPINES**

**Petaling Jaya, 28 April 2020** - MYEG Philippines, Inc. (MYEG Philippines) today launched a contact tracing and digital health profiling smartphone app known as MyEGuard and commenced pilot implementations for the cities of Paranaque City, NCR, Kidapawan City, North Cotabato (Mindanao) and Ilagan City, Isabela (Central Luzon).

The roll-out of MyEGuard will enable authorities in these cities to carry out much-needed contact tracing at a critical juncture in the efforts to contain the COVID-19 pandemic, not only in the Philippines but also globally.

The system was jointly developed in Malaysia by MY E.G. Services Berhad and S5 Systems Sdn Bhd.

In addition to contact tracing, residents of the participating Philippine cities will be assigned a dynamic-coloured QR code, which serves as an indicator of their health status and level of risk of being infected with the COVID-19 virus. The data powering the health code are continuously updated in real-time with readings from temperature checkpoints set-up across various strategic locations that residents pass through as well as with contact tracing information.

“We are honoured to be able to assist these cities in their efforts to contain the contagion of COVID-19 and we will continually improve our system to make our app more efficient and effective overtime. We expect to onboard several more cities in the coming weeks once the pilot trials are successful,” said MYEG Philippines CEO Ann Saldana.

MyEGuard marks the latest innovation introduced by MYEG Philippines as it continues to strengthen its position as the country’s leading e-government solutions provider. MYEG Philippines also operates other digital services including National Bureau of Investigation online clearance and renewals and e-payments in partnership with Land Bank of the Philippines, as well as the provision of online financial offerings such as insurance and loans.
