Ni Hsin Unveils Two Electric Motorcycles

KUALA LUMPUR: Ni Hsin EV Tech (NH EV Tech) Sdn Bhd, a wholly-owned arm of Ni Hsin Group Bhd has unveiled two high-performance electric motorcycles, TC Max and CPx PRO, endorsed by MotoGP icon Jorge Lorenzo.

Manufactured by Nanjing Vmoto Manufacturing Co., Ltd (VMOTO) and assembled by NH EV Tech in Malaysia under license, TC Max and CPx PRO represent cutting-edge e-mobility.

The electric two-wheeler market in Malaysia is poised for a significant upsurge, fueled by environmental consciousness, technological advancements, and supportive governmental policies.

Projections indicate a robust compound annual growth rate of 15.4 per cent from 2025 to 2030.

TC Max embodies agility and excitement, perfect for navigating urban landscapes with its sleek café racer design. On the other hand, CPx PRO boasts an eight-kilowatt motor propelling it to a speed of 105 kilometers per hour.

Ni Hsin emphasised the versatility of both models, highlighting their adaptability to specific requirements.

Accessories like panniers, sirens, and radio systems can be easily integrated, making them suitable for various applications including law enforcement and security units.

NH EV Tech managing director Khoo Chee Kong expressed excitement for the collaboration with VMOTO, aiming to redefine urban transportation and contribute to a sustainable future.

"In the context of sustainable mobility, Ni Hsin is relentless in making its mark to encourage mass adoption of zero-emission transport across Malaysia," he said in a statement.
