Ni Hsin Unveils Two Electric Motorcycles, Featuring MotoGP Legend Jorge Lorenzo

KUALA LUMPUR (May 8): Ni Hsin Group Bhd's (KL:NIHSIN) wholly-owned subsidiary, Ni Hsin EV Tech Sdn Bhd (NH EV Tech), on Wednesday launched two high-powered electric motorcycles, TC Max and CPx PRO, featuring MotoGP legend, Jorge Lorenzo.

TC Max and CPx PRO electric motorcycles are manufactured by Nanjing Vmoto Manufacturing Co, Ltd (VMOTO) and assembled by NH EV Tech in Malaysia under licence.

Lorenzo is also the official VMOTO ambassador. On Thursday, he will lead the early buyers of the VMOTO electric motorcycles on a tour to KLCC Park, Dataran Merdeka and KL Tower to meet his fans at these locations.

According to Ni Hsin, TC Max is a snappy and fun e-motor, a modern café racer capable of entertaining on urban routes while CPx PRO comes with an eight-kilowatt motor reaching a speed of 105 kilometres per hour.

“Combined with ease of maintenance, both TC Max and CPx PRO can be ideally equipped according to specific requests, installing accessories such as panniers, sirens, radio systems, and well-suited for the police, army and security enforcement units,” it said in a statement.

NH EV Tech managing director Khoo Chee Kong said the company is excited to collaborate with VMOTO and looks forward to revolutionising urban mobility and contributing to a greener, smarter future.

“In the context of sustainable mobility, Ni Hsin is relentless in making its mark to encourage mass adoption of zero-emission transport across Malaysia,” he added.

Malaysia’s electric two-wheeler market is on an upward trajectory, driven by environmental consciousness, technological advancements, and supportive government policies.

The market is projected to grow at a compound annual growth rate of 15.4% for the 2025-2030 forecast period in terms of revenue size.
