

**BANK ISLAM MALAYSIA BERHAD  
PILLAR 3 DISCLOSURE  
AS AT 31 DECEMBER 2022**

**Overview**

The Pillar 3 Disclosure for financial year ended 31 December 2022 for Bank Islam Malaysia Berhad (“the Bank”) and its subsidiaries (“the Group”) describes the risk profile, risk management practices and capital adequacy position in accordance with the disclosure requirements governed by Bank Negara Malaysia’s (“BNM”) “Capital Adequacy Framework for Islamic Banks (CAFIB) – Disclosure Requirements (“Pillar 3)”.

The Group adopts the following approaches in determining the capital requirements of Pillar 1 in accordance with BNM’s Guidelines on CAFIB (Basel II – Risk Weighted Assets (“RWA”)) since January 2008:

- Credit and Market Risk – the Standardised Approach (“SA”); and
- Operational Risk – the Basic Indicator Approach (“BIA”).

Under the Standardised Approach, standard risk weights are used to assess the capital requirements whilst under the Basic Indicator Approach, the capital requirements are computed based on a fixed percentage over the Group’s average gross income for a fixed number of quarterly periods.

As required under Pillar 2, the Group has also developed an Internal Capital Adequacy Assessment Process (“ICAAP”) framework which closely integrates the risk and capital assessment processes and ensures that adequate levels of capital are maintained to support the Group’s current and projected demand for capital under expected and stressed conditions. The ICAAP was adopted in 2012 and has been fully implemented since 2013. The ICAAP is updated and approved on an annual basis by the Management Committee, Board Risk Committee (“BRC”) and Board of Directors (“Board”).

**Basis of Disclosure**

The Pillar 3 Disclosure is prepared in accordance with BNM’s Pillar 3 Disclosure Guidelines issued in July 2010 and the Group’s internal policy on Pillar 3 Disclosure; which aims to enhance transparency on the risk management practices and capital adequacy of the Bank and the Group. The disclosures include both qualitative and quantitative disclosures with respect to capital adequacy, credit risk, market risk, liquidity risk, operational risk, management of Investment Account (IA) and key aspects of Shariah governance.

Whilst this document discloses the Group’s assets both in terms of exposures and capital requirements, the information disclosed herein may not be directly comparable with the information in the Full-Year Financial Statements 2022 published by the Group.

These disclosures have been reviewed and verified by the Group Internal Auditor and attested by the Group Chief Executive Officer.

**BANK ISLAM MALAYSIA BERHAD  
PILLAR 3 DISCLOSURE  
AS AT 31 DECEMBER 2022**

**Medium and Location of Disclosure**

The Group's Pillar 3 Disclosure is made available at [www.bankislam.com](http://www.bankislam.com).

**Minimum Regulatory Capital Requirements**

The Group's main activity is Islamic banking business which focuses on retail banking and financing operations. The following tables show the minimum regulatory capital requirement to support the Group's and the Bank's risk weighted assets.

GROUP	31.12.2022		31.12.2021	
	RISK-WEIGHTED ASSETS RM'000	MINIMUM CAPITAL REQUIREMENT AT 8% RM'000	RISK-WEIGHTED ASSETS RM'000	MINIMUM CAPITAL REQUIREMENT AT 8% RM'000
Credit Risk	53,650,821	4,292,066	50,180,739	4,014,459
Less: Credit Risk absorbed by IA	(10,620,157)	(849,613)	(7,423,579)	(593,886)
Market Risk	84,876	6,790	489,559	39,165
Operational Risk	3,971,313	317,705	3,847,886	307,831
<b>Total</b>	<b>47,086,853</b>	<b>3,766,948</b>	<b>47,094,605</b>	<b>3,767,569</b>

BANK	31.12.2022		31.12.2021	
	RISK-WEIGHTED ASSETS RM'000	MINIMUM CAPITAL REQUIREMENT AT 8% RM'000	RISK-WEIGHTED ASSETS RM'000	MINIMUM CAPITAL REQUIREMENT AT 8% RM'000
Credit Risk	53,513,221	4,281,058	50,080,971	4,006,478
Less: Credit Risk absorbed by IA	(10,705,652)	(856,452)	(7,513,437)	(601,075)
Market Risk	84,876	6,790	489,559	39,165
Operational Risk	3,909,361	312,749	3,797,811	303,825
<b>Total</b>	<b>46,801,806</b>	<b>3,744,145</b>	<b>46,854,904</b>	<b>3,748,393</b>

The Group does not have any capital requirement for Large Exposure Risk as there is no amount in excess of the lowest threshold arising from equity holdings as specified in BNM's CAFIB (Risk-Weighted Assets) Guideline.

**BANK ISLAM MALAYSIA BERHAD**  
**PILLAR 3 DISCLOSURE**  
**AS AT 31 DECEMBER 2022**

**1. Scope of Application**

The Pillar 3 Disclosure is prepared on a consolidated basis and comprises information on the Bank (including the offshore banking operations in the Federal Territory of Labuan) and its subsidiaries.

There are no significant restrictions or impediments on the transfer of funds or regulatory capital within the Group. There were no capital deficiencies in any of the subsidiary companies of the Group as at the financial year end.

**2. Capital Adequacy**

**2.1 Capital Management**

The Group's primary objectives when managing capital are to maintain a strong capital position to support business growth and to maintain investors, depositors, customers, and market confidence. In line with this, the Group manages its capital actively and ensures that the capital adequacy ratios which take into account the risk profile of the Group, are above the regulatory minimum requirement.

To ensure that the Group has sufficient capital to support all its business and risk-taking activities, the Group has implemented a sound capital management process in its management systems and processes. A comprehensive capital management framework has been adopted by the Group as a key enabler for value creation which is important to the long-term survival of the Group. This comprehensive capital management process includes thorough risk assessment and risk management techniques that are embedded within the Group's risk governance.

The assessment is based on the approved business plan, its estimation of current risks inherent in the Group and the impact of capital stress tests on the Group's capital plan. The Group aims to achieve the following capital management objectives:

- Meeting regulatory capital requirements;
- Optimising returns to shareholders;
- Maintaining adequate levels and an optimum mix of different sources of capital to support the underlying risks of its business;
- Ensuring adequate capital to withstand shocks and stress;
- Ensuring sufficient capital to expand its business ventures and inorganic growth; and
- Allocating an appropriate amount of capital to business units to optimise return on capital.

**BANK ISLAM MALAYSIA BERHAD  
PILLAR 3 DISCLOSURE  
AS AT 31 DECEMBER 2022**

**2. Capital Adequacy (continued)**

**2.1 Capital Management (continued)**

The Group's capital management is guided by the Capital Management Plan, approved by the Board, to ensure the management of capital is consistent and aligned with the Group's Risk Appetite Statement and ICAAP Document Policy.

The Group's capital management processes comprise:

- Capital Structuring – ensuring that the amount of regulatory and statutory capital available is consistent with the Group's growth plan, risk appetite, and desired level of capital adequacy. Capital structuring focuses on selecting appropriate, most cost-effective mix of capital instruments;
- Capital Allocation – ensuring that the capital is employed efficiently across the Group based on risk-adjusted return on capital; and
- Capital Optimisation – seeking an optimal level of capital by facilitating the optimisation of the risk profile of the balance sheet. This will be done through:
  - reshaping of the balance sheet;
  - capital planning, allocation and optimisation; and
  - a sound management of the capital buffer.

As such, the four fundamental components of a sound capital planning process include:

- Internal control and governance;
- Capital policy and risk capture;
- Forward-looking view; and
- Management framework for preserving capital.

The Group's Capital Management Plan is updated annually and approved by the Board for implementation at the beginning of each financial year. The capital plan is drawn up to cover at least a three-year horizon and takes into account, amongst others, the Group's strategic objectives and business plans, regulatory capital requirements, capital benchmarking against the industry, available supply of capital and capital raising options, performance of business sectors based on a Risk Adjusted Return on Capital ("RAROC") approach, as well as ICAAP and stress testing results.

**BANK ISLAM MALAYSIA BERHAD**  
**PILLAR 3 DISCLOSURE**  
**AS AT 31 DECEMBER 2022**

**2. Capital Adequacy (continued)**

**2.1 Capital Management (continued)**

The Group has fully issued Subordinated Sukuk Murabahah under its Subordinated Sukuk Murabahah Programme of up to RM1.0 billion in nominal value (“Subordinated Sukuk Murabahah Programme”) which was approved by the Securities Commission Malaysia (“SC”) on 7 October 2014. On 6 September 2018, the Group successfully lodged with SC under Lodge and Launch Framework, a Sukuk Murabahah Programme of up to RM10.0 billion in nominal value, which allows issuances of Subordinated Sukuk Murabahah and Senior Sukuk Murabahah. The purpose of the Subordinated Sukuk Murabahah issuance under both programmes is to enhance the capital adequacy of the Group, in line with the requirements under the Basel III capital framework. Both programmes are qualified as Tier 2 regulatory capital of the Bank and the Group in accordance with BNM’s CAFIB (Capital Components) Guideline.

Additionally, on 27 June 2022, the Group successfully lodged with SC under Lodge and Launch Framework, a Sukuk Wakalah Programme of up to RM5.0 Billion in nominal value, for the issuances of Additional Tier-1 Capital Sukuk Wakalah. Subsequently, on 24 August 2022, the Group issued RM500mil Additional Tier 1 Sukuk Wakalah under the RM5.0billion Sukuk Wakalah Programme. This shall qualify as Tier 1 regulatory capital of the Bank and the Group.

Table below depicts a summary of the Subordinated Sukuk Murabahah and Sukuk Wakalah Programme of the Group:

Capital Instrument	Capital Component	Main Features
<b>1) Subordinated Sukuk Murabahah Programme of up to RM1.0 billion (Programme 1)</b>		<ul style="list-style-type: none"> <li>• The tenure of both programmes are as follows:               <ul style="list-style-type: none"> <li>i. **BANK ISLAM MALAYSIA BERHAD  
PILLAR 3 DISCLOSURE  
AS AT 31 DECEMBER 2022**

**2. Capital Adequacy (continued)**

**2.1 Capital Management (continued)**

Total outstanding Subordinated Sukuk Murabahah and Sukuk Wakalah issued under all programmes which are qualified as Tier 1 and Tier 2 regulatory capital of the Bank and the Group as of 31 December 2022 is RM2.2 billion.

**2.2 Internal Capital Adequacy Assessment Process (“ICAAP”)**

The Group has carried out the internal assessment process on capital as prescribed in BNM’s CAFIB - ICAAP (“Pillar 2”) to complement its current capital management practices. The first ICAAP Document Policy was formalised and approved by the Board in March 2013 and is being reviewed on an annual basis. The Group’s ICAAP helps to suggest the minimum internal capital requirement for its current and future business strategies and financial plans for the next 3 years via a comprehensive risk assessment process on its portfolio risk exposures, its risk management practices towards its material risks and potential capital planning buffer required in the event of stress.

The Group’s ICAAP is conducted on a consolidated basis covering all legal entities as suggested by BNM’s Pillar 2 Guideline.

The Group’s ICAAP methodology can be summarised as follows:

Under ICAAP, the following risk types are identified and measured:

- Risks captured under Pillar 1 (i.e., Credit Risk, Market Risk, and Operational Risk);
- Risk not fully captured under Pillar 1 (e.g., Migration and Residual Risk); and
- Risk not covered under Pillar 1 (e.g., Credit Concentration Risk, Profit Rate in the Banking Book, Shariah Non-Compliance Risk, Regulatory/ Compliance Risk, Contagion Risk, and IT Risk).

**BANK ISLAM MALAYSIA BERHAD**  
**PILLAR 3 DISCLOSURE**  
**AS AT 31 DECEMBER 2022**

**2. Capital Adequacy (continued)**

**2.3 Stress Testing**

Regular stress testing (including reverse stress testing) is performed to assess the Group's ability to maintain adequate capital under both normal business cycle and unfavourable economic conditions. The stress testing is embedded within the risk and capital management process of the Group and is a key function of capital planning and business planning processes. Stress Testing also plays an important role in:

- Identifying the possible events or future changes in the financial and economic conditions of the country and globally that could potentially have unfavourable effects on the Group's exposures;
- Identifying the different portfolios response to changes in key economic variables (profit rate, foreign exchange rate, GDP, etc);
- Evaluating the Group's ability to withstand such changes, i.e., its capacity in terms of its capital and earnings, to absorb potentially significant losses; and
- Analysing the Group's ability to meet the minimum regulatory capital requirement at all times throughout a reasonably severe economic crisis.

The Group has put in place a stress testing programme (including reverse stress testing) which has taken into account all risks deemed material to the Group, namely credit risk, market risk, liquidity risk and operational risk including Shariah non-compliance risk, regulatory compliance risk, contagion risk and IT risk.

In line with the Group's Stress Testing Policy, ad-hoc and more frequent stress testing has been conducted to assess the impact of deterioration on specific risk areas, in line with stressed macroeconomic variables. The impact of COVID-19 pandemic outbreak such as repayment assistance, vulnerable portfolio and liquidity risk to the Group were assessed to ensure the Group's ability to maintain adequate capital under stressed condition.

**2.4 Capital Adequacy Ratios**

The Group is required to comply with the Common Equity Tier 1 ("CET 1") Capital Ratio, Tier 1 Capital Ratio and Total Capital Ratio ("TCR") as prescribed by BNM. The Group has been in compliance with all prescribed capital adequacy ratios throughout the period.

Total capital and capital adequacy ratios of the Group have been computed based on the updated BNM's CAFIB - Capital Components Guideline issued on 9 December 2020 and BNM's CAFIB – RWA Guideline issued on 3 May 2019. The minimum regulatory capital adequacy ratios requirement for CET 1 capital ratio, Tier 1 capital ratio and TCR including capital buffers i.e., Capital Conservation Buffers ("CCB") are 7.0%, 8.5% and 10.5% respectively.

**BANK ISLAM MALAYSIA BERHAD**  
**PILLAR 3 DISCLOSURE**  
**AS AT 31 DECEMBER 2022**

**2. Capital Adequacy (continued)**

**2.4 Capital Adequacy Ratios (continued)**

The CCB is intended to encourage the build-up of capital buffers by individual Islamic banking institutions during normal times that can be drawn down during stress periods.

The table below shows the composition of the regulatory capital and capital adequacy ratios as of 31 December 2022, determined by the requirements of the CAFIB. The capital adequacy ratios of the Group and Bank are set as per below:

**(a) The capital adequacy ratios of the Group and of the Bank:**

Before effect of IA	GROUP		BANK	
	31.12.2022	31.12.2021	31.12.2022	31.12.2021

### **3. Risk Management**

#### **3.1 Overview**

The Group's mission, with respect to risk management is to advance its risk management capabilities, culture and practices so as to be in line with internationally accepted standards and practices.

In that regard, the specific objectives of managing risk are to:

- Inculcate a risk-awareness culture throughout the Group;
- Establish a standard approach and methodology in managing risks namely credit, market, liquidity, operational, IT & cyber risk, compliance risks and contagion risk across the Group;
- Clarify functional structures including objectives, roles and responsibilities;
- Implement and use a risk management information system that meets the international standards on confidentiality, integrity and its availability;
- Develop and use tools, such as economic capital, value at risk, and stress testing to support the measurement of risks and enhance risk-based decisions;
- Ensure that risk policies and overall risk appetite are in line with business targets; and
- Ensure that the Group's capital can support current and planned business needs in terms of risk exposures.

#### **3.2 Risk Management Functional and Governance Structure**

The Group has aligned its organisational responsibilities with the objective of ensuring a common view of risks across the Group. As a matter of prudence and good governance, the Group's core risk management functions, which report to the Board Risk Committee ("BRC"), are independent and segregated from the business divisions and centralized at head office.

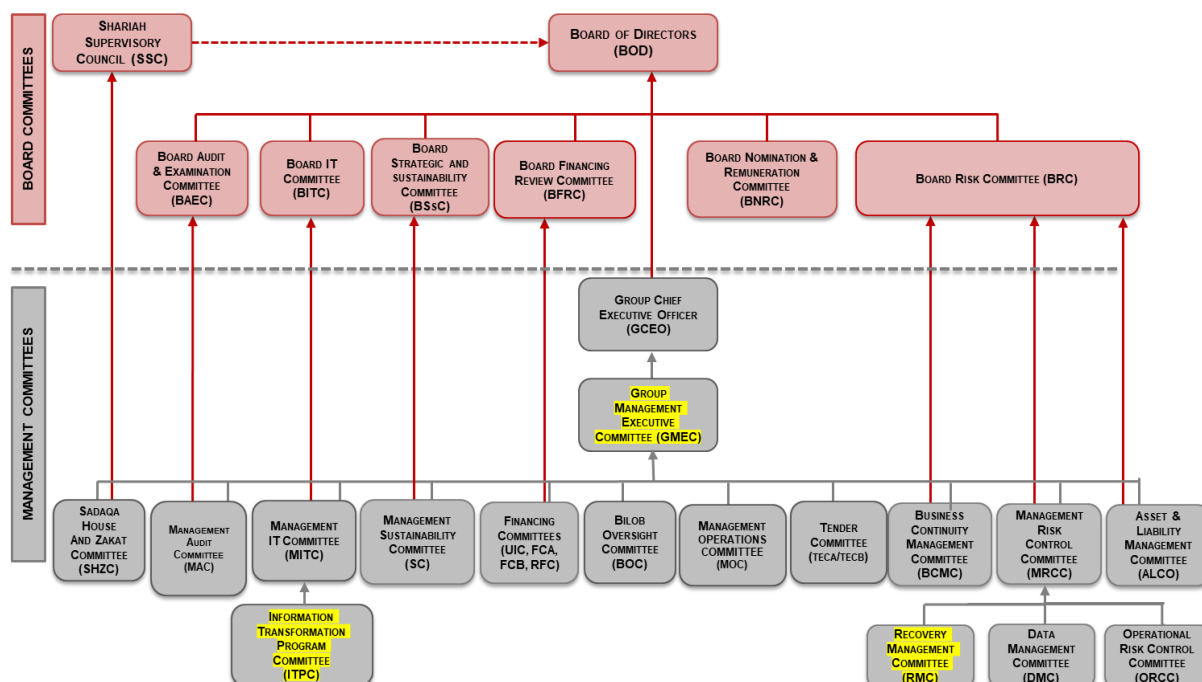

**BANK ISLAM MALAYSIA BERHAD**  
**PILLAR 3 DISCLOSURE**  
**AS AT 31 DECEMBER 2022**

**3. Risk Management (continued)**

**3.2 Risk Management Functional and Governance Structure (continued)**

The following illustrates the Group's governance structure:

The Group recognises the fact that the essence of banking and financial services is centred on risk taking activities. The Group therefore:

- Recognises that it has to manage risks effectively to achieve its business targets;
- Reaches an optimum level of risk-return in order to maximise stakeholders' value; and
- Ensures effective and integrated risk management processes that are commensurate with the size and complexity of the current and future operations of the Group within its risk appetite and tolerance.

The Group has established the Group Risk Appetite Statement Policy that forms an integral part of the Group's strategy and business plans. Risk appetite is an expression of the maximum level of risk that the Group is prepared to accept in support of a stated strategy, impacting all businesses from a credit, market and operational risk viewpoint.

## **4. Credit Risk**

### **4.1 Overview**

Credit risk is the risk of a customer or counterparty failing to fulfil its financial obligations in accordance with agreed terms. It arises from all transactions that could lead to actual, contingent or potential claims against any party, customer or obligor (collectively referred to as counterparties). The types of credit risks that the Group considers to be material include: Default Risk, Counterparty Risk, Credit Concentration Risk, Residual/ Credit Mitigation Risk and Migration Risk.

### **4.2 Credit Risk Governance**

The management of credit risk is principally carried out by using sets of policies and guidelines approved by the Management Risk Control Committee (“MRCC”) and/or BRC, guided by the Boards’ approved Group Risk Appetite Statement Policy.

The Group has several levels of Financing Committees, which assess and approve credits at their specified authority levels.

MRCC is responsible under the authority delegated by BRC for managing credit risk at strategic level. MRCC reviews the Group’s credit risk policies and guidelines, aligns credit risk management with business strategies and planning, reviews credit profile of the credit portfolios and recommends necessary actions to ensure that the credit risk remains within established risk tolerance levels.

The Group’s credit risk management governance includes the establishment of detailed credit risk policies, guidelines and procedures which document the Group’s financing standards, discretionary powers for financing approval, credit risk ratings methodologies and models, acceptable collaterals and valuation, and the review, rehabilitation and restructuring of problematic and delinquent financing.

### **4.3 Management of Credit Risk**

The management of credit risk is being performed by the Group Credit Management Division (“CMD”) and Group Risk Management Division (“RMD”) and two other units outside of CMD and RMD domain, namely, Credit Administration Department and Recovery & Rehabilitation Division. The combined objectives are, amongst others:

- To build a high quality credit portfolio which is in line with the Group’s overall strategy and risk appetite;
- To ensure that the Group is compensated for the risk taken, balancing/ optimising the risk/ return relationship;
- To develop an increasing ability to recognise, measure and avoid or mitigate potential credit risk problem areas; and
- To conform with statutory, regulatory and internal credit requirements.

#### **4. Credit Risk (continued)**

##### **4.3 Management of Credit Risk (continued)**

The Group monitors its credit exposures either on a portfolio basis or individual basis through annual reviews. Credit risk is proactively monitored through a set of early warning signals that could trigger immediate reviews of (a certain part of) the portfolio. The affected portfolio or financing is placed on a watchlist to enforce close monitoring and prevent financing from turning impaired and to increase chances of full recovery.

A detailed limit structure is in place to ensure that risks taken are within the risk appetite as set by the Board and to avoid credit risk concentration on a single customer, sector, product, etc.

Credit risk arising from dealing and investing activities are managed by the establishment of limits which include counterparty limits and permissible acquisition of private entities' instruments, subject to a specified minimum rating threshold. Furthermore, the dealing and investing activities are monitored by an independent middle office unit.

##### **4.4 Capital Treatment for Credit Risk**

The Group adopts the Standardized Approach to compute the credit risk capital requirement under BNM's CAFIB.

**BANK ISLAM MALAYSIA BERHAD**  
**PILLAR 3 DISCLOSURE**  
**AS AT 31 DECEMBER 2022**

**4. Credit Risk (continued)**

**4.5 Credit Quality of Gross Financing and Advances**

The table below presents the Group's and the Bank's gross financing and advances analysed by credit quality:

	<b>GROUP AND BANK</b>	
	<b>31.12.2022</b>	<b>31.12.2021</b>
	<b>RM'000</b>	<b>RM'000</b>
Neither past due nor impaired	64,437,823	58,234,986
Past due but not impaired	668,802	414,366
Impaired	835,232	568,383
	<b>65,941,857</b>	<b>59,217,735</b>
Gross Impaired Financing as a percentage of Gross Financing and Advances	<b>1.27%</b>	<b>0.96%</b>

**(a) Neither Past Due nor Impaired**

Financings classified as neither past due nor impaired are financings of which the customers have not missed contractual payments (profit or principal) when contractually due and are not impaired as there is no objective evidence of impairment.

The credit quality of gross financing and advances which are neither past due nor impaired is as follows:

	<b>GROUP AND BANK</b>	
	<b>31.12.2022</b>	<b>31.12.2021</b>
	<b>RM'000</b>	<b>RM'000</b>
Excellent to Good	57,611,552	52,111,710
Satisfactory	6,486,313	5,813,008
Fair	339,958	310,268
	<b>64,437,823</b>	<b>58,234,986</b>

Internal rating definition:

- **Excellent to Good:** Sound financial position with no difficulty in meeting its obligations.
- **Satisfactory:** Adequate safety of meeting its current obligations but more time is required to meet the entire obligations in full.
- **Fair:** High risks on payment obligations. Financial performance may continue to deteriorate.

**BANK ISLAM MALAYSIA BERHAD**  
**PILLAR 3 DISCLOSURE**  
**AS AT 31 DECEMBER 2022**

**4. Credit Risk (continued)**

**4.5 Credit Quality of Gross Financing and Advances (continued)**

**(b) Past Due but Not Impaired**

Financing classified as past due but not impaired is financing of which its contractual profit or principal payments are past due, but the Group and the Bank believe that impairment is not appropriate on the basis of the level of collateral available and/or the stage of collection amounts owed to the Group and the Bank.

Analysis of the past due but not impaired financings and advances by ageing:

	<b>GROUP AND BANK</b>

**PILLAR 3 DISCLOSURE**  
**AS AT 31 DECEMBER 2022**

**4. Credit Risk (continued)**

**4.5 Credit Quality of Gross Financing and Advances (continued)**

**(c) Impaired Financing and Advances**

A financing is classified as impaired when the principal or profit or both are past due for three months or more, or where a financing is in arrears for less than three months, but the financing exhibits indications of significant credit weakness.

The financing or group of financings is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that have occurred after the initial recognition of the financing (a 'loss event') and that the loss event has an impact on the estimated future cash flows of the financing or group of financings that can be reliably estimated.

The Group and the Bank first assess individually whether the objective evidence of impairment exists individually for financings which are individually significant, and collectively for financings which are not individually significant. If it is determined that no objective evidence of impairment exists for an individually assessed financing, the financing is included in a group of financings with similar credit risk characteristic and collectively assessed for impairment.

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the financing's carrying amount and the present value of the estimated future cash flows. The carrying amount of the financing is reduced through the use of an allowance account and the amount of the loss is recognised in the statement of profit or loss.

Impaired financing by assessment type:

**PILLAR 3 DISCLOSURE**  
**AS AT 31 DECEMBER 2022**

**4. Credit Risk (continued)**

**4.7 Assignment of Risk Weights for Portfolios Under the Standardised Approach**

Under the Standardised Approach, the Group makes use of credit ratings assigned by credit rating agencies in the calculation of credit risk-weighted assets. The following are the rating agencies or External Credit Assessment Institutions (“ECAI”) ratings used by the Group and are recognised by BNM as per the CAFIB Guideline:

- (a) Standard & Poor’s (“S&P”)
- (b) Moody’s Investors Services (“MOODY’S”)
- (c) Fitch Ratings (“FITCH”)
- (d) Rating Agency Malaysia Berhad (“RAM”)
- (e) Malaysian Rating Corporation Berhad (“MARC”)

The ECAI ratings accorded to the following counterparty exposure classes are used in the calculation of risk-weighted assets for capital adequacy purposes:

- (a) Sovereigns and central banks
- (b) Banking institutions
- (c) Corporates

**Unrated and Rated Counterparties**

As a general rule, the rating specific to the credit exposure is used, i.e., the issue rating. Where no specific rating exists, the credit rating assigned to the issuer or counterparty of that particular credit exposure is used. In cases where an exposure has neither an issue nor an issuer rating, it is deemed as unrated or the rating of another rated obligation of the same counterparty may be used if the exposure is ranked at least *pari passu* with the obligation that is rated, as stipulated in the CAFIB Guideline.

Where a counterparty or an exposure is rated by more than one ECAI, the second highest rating is used to determine the risk weight. In cases where the credit exposures are secured by guarantees issued by eligible or rated guarantors, the risk weights similar to that of the guarantor are assigned.

The below table summarises the rules governing the assignment of risk weights under the Standardised Approach:

Rating Category	S & P	MOODY’S	FITCH	RAM	MARC
1	AAA TO AA-	Aaa to Aa3	AAA to AA-	AAA TO AA3	AAA to AA-
2	A+ TO A-	A1 to A3	A+ to A-	A1 TO A3	A+ to A-
3	BBB+ TO BBB-	Baa1 to Baa3	BBB+ to BBB-	BBB1 to BBB3	BBB+ to BBB-
4	BB+ TO BB-	Ba1 to Ba3	BB+ to BB-	BB1 to BB3	BB+ to BB-
5	B+ TO B-	B1 to B3	B+ to B-	B1 to B3	B+ to B-

**BANK ISLAM MALAYSIA BERHAD  
PILLAR 3 DISCLOSURE  
AS AT 31 DECEMBER 2022**

**4. Credit Risk (continued)**

**4.7 Assignment of Risk Weights for Portfolios Under the Standardised Approach (continued)**

The below table summarises risk weight mapping matrix for each credit quality rating category:

Rating Category	Risk Weights Based on Credit Rating of the Counterparty Exposure Class				
	Sovereign and Central Banks	Corporate	Banking Institutions		
			Maturity > 6 month	Maturity <= 6 month	Maturity <= 3month
1	0%	20%	20%	20%	
2	20%	50%	50%	20%	
3	50%	100%	50%	20%	
4	100%	100%	100%	50%	20%
5	100%	150%	100%	50%	
6	150%	150%	150%	150%	
Unrated	100%	100%	50%	20%	

Under CAFIB, exposures to and/or guaranteed by the Federal Government of Malaysia and Bank Negara Malaysia are accorded a preferential sovereign risk weight of 0%.

#### **4. Credit Risk (continued)**

##### **4.9 Credit Risk Mitigation (CRM)**

As a first way out, the assessment of credit when granting a financing facility is based on a particular customer's cash flow as the main source of payment and not on the collateral offered. However, the acceptance of tangible security as collateral would offer a second way out in the event of business failure thereby improving recovery rates.

The types of collaterals accepted by the Group would have an impact on the calculation of the Group's capital adequacy as the quality and the type of collaterals determine whether the Group is able to obtain capital relief and the extent of such relief. Capital relief is defined as the assignment of a lower or zero risk weight to the counterparty exposure by setting off or reducing the counterparty exposure against the collateral value.

The main types of collaterals obtained by the Group to mitigate credit risks are as follows:

- (a) Cash on lien
- (b) Landed property
- (c) Shariah compliant quoted shares and unit trusts
- (d) Malaysian Federal Government Securities
- (e) Rated/ Unrated Islamic Securities/ Sukuk
- (f) Guarantee

The reliance that can be placed on CRM is carefully assessed in light of issues such as compliance with Shariah rules and principles, legal enforceability, market value and counterparty credit risk of the guarantor. The Group has put in place policies and procedures which govern the determination of eligibility of various collaterals to protect the Group's position from the onset of a customer relationship on the CRM, for instance, in requiring standard terms and conditions or specifically agreed upon documentation to ensure the legal enforceability of the credit risk mitigants.

In order to obtain a fair assessment of collateral securing the financing facility, a valuation is performed periodically ranging from weekly to annually, depending on the type, liquidity and volatility of the collateral value.

In mitigating the counterparty credit risks arising from foreign exchange and derivatives transactions, the Group enters into master agreements that provide for closeout netting with counterparties, whenever possible. A master agreement that governs all transactions between the two parties, creates a greater legal certainty that the netting of outstanding obligations can be enforced upon termination of outstanding transactions if an event of default occurs.

**AS AT 31 DECEMBER 2022**

**4. Credit Risk (continued)**

**4.9 Credit Risk Mitigation (CRM) (continued)**

The Group manages its credit risk concentrations by diversifying its portfolios through several measures. The Group monitors credit risk limits via, among others, sector limits, program limits, deviation limits and Single Counterparty Exposure Limits (SCEL). The following tables disclose the extent to which exposures are covered by eligible credit risk mitigants.

Disclosure of Credit Risk Mitigation (CRM):

## **5. Market Risk**

### **5.1 Overview**

All the Group's financial instruments are subject to the risk that market prices and rates will move, resulting in profit or losses to the Group. The following are the main market risk factors that the Group is exposed to:

- **Profit Rate Risk:** also known as the Rate of Return Risk is the potential impact on the Group's profitability and capital caused by changes in the rate of return, due to general market movements or issuer/customer specific reasons;
- **Foreign Exchange Risk:** the impact of exchange rate movements on the Group's currency positions;
- **Equity Investment Risk:** the profitability impact on the Group's equity positions or investments caused by changes in equity prices or values;

The Group separates the market risk exposures into either trading book or banking book portfolios. Trading book portfolios include those positions arising from market making, proprietary position taking and other marked-to-market positions as per the Board approved Trading Book Policy Statements. Banking book portfolios primarily arise from the Group's profit rate management of the Group's asset & liabilities and investment portfolio mainly for liquidity management.

### **5.2 Market Risk Governance**

The management of market risk is principally carried out by using sets of policies and guidelines approved by Asset & Liability Committee ("ALCO") and/or BRC, guided by the Board's approved Group Risk Appetite Statement Policy.

ALCO is responsible under the authority delegated by BRC for managing market risk at strategic level.

### **5.3 Management of Market Risk**

The objective is to manage market risk exposures in order to optimise return on risk while maintaining a market risk profile consistent with the Group's approved risk appetite.

All market risk exposures are managed by Treasury, who has the necessary skills, tools, management and governance to manage such risks. The management of market risk is guided by comprehensive limits, policies and guidelines which are periodically reviewed.

Market Risk Management Department ("MRMD") is an independent risk control function and is responsible for ensuring effective implementation of market risk management framework. MRMD is also responsible for developing and reviewing the Group's market risk management guidelines and policies, monitoring tools, behavioural assumptions and limit setting methodologies. Strict escalation procedures are documented and approved by ALCO and/or BRC. In addition, the market risk exposures and limits are regularly reported to ALCO and BRC.

**5. Market Risk (continued)**

**5.3 Management of Market Risk (continued)**

Other controls to ensure that market risk exposures remain within tolerable levels include regular stress testing, ad-hoc simulations, and rigorous new product approval procedures. Stress test results are produced regularly to determine the impact of changes in profit rates, foreign exchange rates and other risk factors on the Group's profitability, capital adequacy and liquidity. The stress test provides the Management and BRC with an assessment of the financial impact of identified extreme events on the market risk exposures of the Group.

**a) Profit rate risk in the banking book portfolio**

Profit rate risk in the banking book portfolio is managed and controlled using measurement tools known as Earnings-at-Risk ("EaR") and Economic Value of Equity ("EVE"). The Group monitors the sensitivity of EaR and EVE under varying profit rate scenarios (i.e., simulation modelling). The model is a combination of standard and non-standard scenarios relevant to the local market. The standard scenarios include the parallel fall or rise in the profit rate curve and historical simulation. These scenarios assume no management action. Hence, it does not incorporate actions that would be taken by Treasury to mitigate the impact of the profit rate risk. In reality, depending on the view on future market movements, Treasury would proactively manage and strategize to change the profit rate exposure profile to minimise losses and to optimise net revenues. The Group's hedging and risk mitigation strategies range from the use of derivative financial instruments, such as profit rate swaps, to more intricate hedging strategies to address inordinate profit rate risk exposures.

The table below shows the Group's and Bank's profit rate sensitivity to a 150 basis points parallel shift as at reporting date.

Group	31 December 2022		31 December 2021	
	(Decrease) / Increase		(Decrease) / Increase	
	-150bps	+150bps	-150bps	+150bps
	RM million	RM million	RM million	RM million
Impact on EaR	(194.6)	194.6	(206.6)	206.6
Impact on EVE	381.7	(381.7)	294.0	(294.0)

**BANK ISLAM MALAYSIA BERHAD**  
**PILLAR 3 DISCLOSURE**  
**AS AT 31 DECEMBER 2022**

**5. Market Risk (continued)**

**5.3 Management of Market Risk (continued)**

**a) Profit rate risk in the banking book portfolio (continued)**

Bank	31 December 2022		31 December 2021	
	(Decrease) / Increase		(Decrease) / Increase	
	-150bps	+150bps	-150bps	+150bps
	RM million	RM million	RM million	RM million
Impact on EaR	(192.3)	192.3	(204.7)	204.7
Impact on EVE	380.0	(380.0)	293.6	(293.6)

**b) Market Risk in the trading book portfolio**

Market risk in the trading book portfolio is monitored and managed using Value-at-Risk ("VaR"). It is a technique that estimates the potential losses that could occur as a result of market rates movements over a specified time horizon and to a given level of confidence. The VaR model used by the Bank is based on historical simulation which derives plausible future scenarios from the past series of recorded market rates and prices. The historical simulation model used by the Bank incorporates the following features:

- Potential market movements are calculated with reference to data from the past two years;
- Historical market rates are calculated with reference to foreign exchange rates and profit rates; and
- VaR is calculated using a 99 per cent confidence level and for a one-day holding period.

A summary of the VaR position of the Bank's trading book portfolios as at the reporting date is as follows:

Bank	As at 31.12.2022	1.1.2022 to 31.12.2022		
	RM million	Average RM million	Maximum RM million	Minimum RM million
Profit Rate Risk	0.004	0.58	1.66	0.004
Foreign Exchange Risk	0.19	1.58	3.35	0.19
Overall	0.20	2.15	4.49	0.20
Bank	As at 31.12.2021	1.1.2021 to 31.12.2021		
	RM million	RM million	RM million	RM million
Profit Rate Risk	0.14	1.05	2.39	0.14
Foreign Exchange Risk	0.36	0.66	1.19	0.34
Overall	0.50	1.71	2.78	0.50

**BANK ISLAM MALAYSIA BERHAD**  
**PILLAR 3 DISCLOSURE**  
**AS AT 31 DECEMBER 2022**

**5. Market Risk (continued)**

**5.3 Management of Market Risk (continued)**

**c) Foreign Exchange Risk**

The Bank manages and controls the trading book portfolio's foreign exchange risk by limiting the net open exposure to individual currencies and on an aggregate basis. For the Bank-wide (trading and banking portfolios) foreign exchange risk, the Bank manages and controls by limiting the net open exposure on an aggregate basis.

***Sensitivity Analysis***

The Bank has a sensitivity limit for managing the foreign exchange risk in place. The foreign currency revaluation sensitivity for the Bank as at reporting date is summarised as follows (only net open position for major currencies are shown in its specific currency in the table below. For other currencies, these exposures are grouped as "Others"):

Bank	31 December 2022		31 December 2021	
	-1% Depreciation	+1% Appreciation	-1% Depreciation	+1% Appreciation
	RM'000	RM'000	RM'000	RM'000
US Dollar	(4,805)	4,805	12,136	(12,136)
Euro	4,348	(4,348)	4,576	(4,576)
Others	(143)	143	(193)	193

**5.4 Capital Treatment for Market Risk**

The Group adopts the Standardised Approach to compute the market risk capital requirement under BNM's CAFIB.

## **6. Liquidity Risk**

### **6.1 Overview**

Liquidity risk is the risk of adverse impact to the financial condition of the Group, or the soundness of the Group being adversely affected by an inability (or perceived inability) to meet its contractual obligations. This risk can arise from mismatches in the timing of cash flows.

The Group maintains a diversified and stable funding base comprising retail and corporate customer deposits. This is augmented by wholesale funding and highly liquid assets portfolios.

The objectives of the Group's liquidity management are to ensure that all foreseeable funding commitments and deposit withdrawals can be met when due and that wholesale market access remains accessible and cost effective.

Savings accounts, current accounts, investment accounts (IA) and term deposits form a critical part of the Group's funding profile and the Group places considerable importance on maintaining their stability. The stability depends upon preserving depositors' confidence in the Group and the Group's capital strength and liquidity, and on competitive and transparent pricing.

The Group's liquidity management is primarily carried out in accordance with Bank Negara Malaysia's requirements and the internal limits approved by ALCO and/or BRC. The limits vary, taking into account the depth and liquidity of the market in which the Group operates. The Group maintains a strong liquidity position and manages the liquidity profile of its assets, liabilities, and commitments to ensure that cash flows are appropriately balanced, and all obligations are met when due.

The Group's liquidity management process includes:

- Daily projection of cash flows and ensuring that the Group has sufficient liquidity surplus and reserves to sustain a sudden liquidity shock;
- Projecting cash flows and considering the level of liquid assets necessary in relation thereto;
- Maintaining liabilities of appropriate term relative to the asset base;
- Maintaining a diverse range of funding sources with adequate back-up facilities;
- Monitoring depositor concentration in order to avoid undue reliance on large individual depositors and ensure a satisfactory overall funding mix; and
- Managing the maturities and diversifying funding liabilities across products and counterparties.

## **6. Liquidity Risk (continued)**

### **6.2 Liquidity Risk Governance**

The management of liquidity risk is principally carried out by using sets of policies and guidelines approved by ALCO and/or BRC, guided by the Board's approved Group Risk Appetite Statement Policy. ALCO is responsible under the authority delegated by BRC for managing liquidity risk at strategic level.

### **6.3 Management of Liquidity Risk**

All liquidity risk exposures are managed by Treasury, who has the necessary skills, tools, management and governance to manage such risks. Limits and triggers are set to meet the following objectives:

- Maintaining sufficient liquidity surplus and reserves to sustain a sudden liquidity shock;
- Ensuring that cash flows are relatively diversified across all maturities;
- Ensuring that the deposit base is not overly concentrated on a relatively small number of depositors;
- Maintaining sufficient borrowing capacity in the Interbank market and highly liquid financial assets to back it up; and
- Not over-extending financing activities relative to the deposit base.

MRMD is an independent risk control function and is responsible for ensuring efficient implementation of liquidity risk framework. It is also responsible for developing the Group's liquidity risk management guidelines, monitoring tools, behavioural assumptions and limit setting methodologies. Strict escalation procedures are documented and approved by ALCO and/or BRC, with proper authorities to ratify or approve the excess. In addition, the liquidity risk exposures and limits are regularly reported to ALCO and BRC.

Stress testing and scenario analysis are important tools used by the Group to manage the liquidity risk. Stress test results are produced regularly to determine the impact of a sudden liquidity shock. The stress-testing provides the Management and BRC with an assessment of the financial impact of identified extreme events on the liquidity and funding risk exposures of the Group.

Another key control feature of the Group's liquidity risk management is the liquidity contingency management plans. These plans identify the pre-emptive quantitative and qualitative indicators of stress conditions arising from systemic or other crises and provide guidance on actions to be taken in order to minimize the adverse implications to the Group.

## **7. Operational Risk**

### **7.1 Overview**

Operational Risk is defined as the “risk of loss resulting from inadequate or failed internal processes, people and systems or from external events, which includes legal risk and Shariah non-compliance risk but excludes strategic and reputational risk”.

It is inherent in all banking products, activities, processes and systems and the effective management of operational risk has always been a fundamental element of a bank’s risk management programme.

### **7.2 Operational Risk Governance**

The Group’s operational risk management (“ORM”) is guided by its ORM Policy, Guideline and Group Enterprise-Wide Risk Management Policy, as well as its Group Risk Appetite Statement Policy which are designed to provide a sound and well-controlled operational environment within the Group.

BRC is a committee of Board to oversee the Management’s activities in managing risks for the Group, including operational risk. Its roles, with regard to ORM, include reviewing and recommending ORM Policy, strategies and risk appetite for Board’s approval.

MRCC, under the authority delegated by BRC is responsible to perform the oversight function and to ensure effective management of issues relating to operational risk at strategic level. Operational Risk Control Committee (“ORCC”) which is a sub-committee of MRCC is primarily responsible in ensuring effective implementation and maintenance of policies, processes, and systems for managing operational risk for the Group.

Notwithstanding the above, the various Business & Support Units (“BU/SU”) are responsible for managing operational risk within their respective domains on a day-to-day basis and ensuring that their business & operational activities are carried out within the established ORM policies, guidelines, procedures and limits. To reinforce accountability and ownership of risk & control at BU/SU level, a Risk Controller (“RC”) for each BU/SU is appointed and Embedded Risk and Compliance Unit (“ERU”) is established at selected BU/SU to assist in driving the risk & control programme for the Group.

Ultimately, all staff of the Group are to ensure they properly discharge their day-to-day responsibilities and are well-equipped with the necessary knowledge including the policies and procedures in executing their job functions. This is in line with our Risk Management Tagline, i.e., “Managing Risk is Everyone’s Business”.

## **7. Operational Risk (continued)**

### **7.3 Management of Operational Risk**

The Group recognises and emphasises the importance of ORM and manages this risk through a control-based environment where processes are documented, authorisation is independent, transactions are reconciled and monitored, and business activities are carried out within the established ORM policies, guidelines, procedures, and limits.

The Group's overall governance approach in managing operational risk is premised on the Three Lines of Defence Approach:

- a) **1st Line of Defence** – The risk owner or risk-taking unit i.e., BU/SU is accountable for putting in place a robust control environment within their respective units. They are responsible for the day-to-day management of operational risk. To reinforce accountability and ownership of risk and control within 1<sup>st</sup> Line of Defence, the RC is appointed at each BU/SU and ERU is established at selected BU/SU.

**2nd Line of Defence** – Operational Risk Management Department (“ORMD”) is responsible for establishing and maintaining the ORM Policy and its supporting guidelines/ manuals, developing methodologies and various ORM tools to facilitate the management of operational risk, monitoring the effectiveness of ORM, assessing operational risk issues from the risk owner and escalating operational risk issues to the relevant governance level with recommendations on appropriate risk mitigation strategies. In creating a strong risk culture, ORMD is also responsible to promote risk awareness across the Group. Shariah Risk Management Unit (“SRMU”), which forms part of ORMD, is responsible for managing the Shariah non-compliance risk (“SNCR”) by establishing and maintaining appropriate guidelines on Shariah Risk Management (SRM) by facilitating the process of identifying, assessing, controlling, and monitoring SNCR and promoting SNCR awareness.

Group Compliance Division, which includes Shariah Compliance Department and Group Information Security & Governance Division (“ISGD”) complement the role of ORMD as the 2<sup>nd</sup> Line of Defence.

Group Compliance Division is responsible for ensuring effective oversight on compliance-related risks such as regulatory compliance risk, compliance risk, corruption risk, money laundering and terrorism financing risks through proper classification of risks and developing, reviewing, and enhancing compliance-related training programmes, as well as conducting trainings that promote awareness creation. Shariah Compliance Department under Group Compliance Division is responsible for reviewing and monitoring Shariah compliance of the Group's operations, activities, and services at BU/ SU level.

**7. Operational Risk (continued)**

**7.3 Management of Operational Risk (continued)**

ISGD is responsible in managing information technology risk by establishing, maintaining, and enforcing information technology risk policies/ guidelines and it works closely with Group Technology Division in identifying, assessing, mitigating, and monitoring of information technology risk in the Group.

- b) **3rd Line of Defence** – Group Internal Audit including Shariah Audit Department provides independent assurance to the Board and senior management on the effectiveness of the ORM and SRM process.

**7.4 ORM Tools & Mitigation Strategies**

The Group employs ORM tools comprising proactive and reactive tools which are in line with the best practices in managing and mitigating operational risks, namely:

Overview of ORM Tools				
Proactive Tools				Reactive Tools
Risk Control Self-Assessment	Key Risk Indicator	Operational Risk Review	New Product Services Approval Process	Risk Loss Event Management & Reporting
<ul style="list-style-type: none"> <li>Self-assessment to identify and assess operational risks by Risk Owners;</li> <li>The tool creates ownership and increases operational risk awareness.</li> </ul>	<ul style="list-style-type: none"> <li>A forward-looking tool to identify potential risks and to enable counter measures and risk mitigation actions before an incident occurs (early warning system);</li> <li>To assist management to focus on high-risk issues.</li> </ul>	<ul style="list-style-type: none"> <li>End- to-end review of activities to identify risks and ensure appropriate controls are in place and are effective;</li> <li>To ensure controls are aligned with RCSA and able to mitigate the identified risk.</li> </ul>	<ul style="list-style-type: none"> <li>To ensure risks are identified and adequate controls are in place prior to launching of new product/ services.</li> </ul>	<ul style="list-style-type: none"> <li>Centralised group-wide loss database which provides line of business loss reporting overview, tracks frequency of events and facilitates detailed reviews of the incident and its impact.</li> </ul>
Risk Analysis & Reporting				
<ul style="list-style-type: none"> <li>Analysis and reporting of qualitative and quantitative results from various ORM tools.</li> </ul>				
Scenario Analysis				
<ul style="list-style-type: none"> <li>A systematic and forward-looking tool of obtaining expert opinions to derive new risks, test the efficiency of existing controls and highlights unexpected risks.</li> </ul>				

In addition, a comprehensive Business Continuity Management (“BCM”) function has been established within the Group to ensure that in the event of material disruptions from internal or external events, critical business functions can be maintained or restored in a timely manner. This ensures minimal adverse impact on customers, staff and products and services. BCM constitutes an essential component of the Group’s risk management process by providing a controlled response to potential operational risk that could have a significant impact on the Group’s critical processes and revenue

## **7. Operational Risk (continued)**

### **7.4 ORM Tools & Mitigation Strategies (continued)**

streams. The Group is also continuously reviewing its critical business operations' resilience through regular testing and dependencies assessment on its assets (systems, data, third parties, facilities, processes and people) in order to ensure it has the required capability and resources to effectively prepare for different disruption events.

As part of the risk transfer strategy, the Group obtains a 3rd party Takaful coverage to cover for the Group's high impact loss events.

The Group also ensures that the group-wide Operational Risk awareness programme is conducted on an ongoing basis. This training programme emphasises on inculcating an operational risk culture among staff, effective implementation of ORM tools, fraud awareness, BCM and other aspects of ORM.

### **7.5 Capital Treatment for Operational Risk**

Operational Risk capital charge is calculated using the BIA as per BNM's CAFIB. The BIA for operational risk capital charge calculation applies an alpha (15%) to the average of positive gross income that was achieved over the previous three years by the Group. The RWA amount is computed by multiplying the minimum capital required with a multiplier of 12.5 (reciprocal of 8%).

## **8. Shariah Governance**

### **8.1 Overview**

By virtue of BNM's Shariah Governance Policy Document ("SGPD"), the Group has established a sound and robust Shariah governance framework with the emphasis placed on the roles of its key functionalities, which include having in place an effective and responsible Board and Management and an independent Shariah Supervisory Council ("SSC") that is supported by strong and competent internal Shariah functions.

As part of the robust Shariah governance framework, to date, the Group has put in place the Group Shariah Compliance Policy, Shariah Compliance Guideline, Shariah Compliance Marketing Guideline, Business Zakat Guideline and Charity Fund Management Guideline. These help to ensure the Group's business activities and behaviors are in compliance with Shariah rules and principles, provisions of the Islamic Financial Services Act ("IFSA") 2013, BNM's SGPD and its other rules and regulations, and the resolutions of BNM, Securities Commission ("SC") and Labuan Financial Services Authority ("LFSA")'s Shariah Advisory Council and the SSC.

### **8.2 Shariah Risk Management**

The Group's Shariah risk management as part of operational risk management is guided by Operational Risk Management ("ORM") Policy and Guidelines which set out the high-level framework supporting the Shariah Compliance Policy and detail out the Shariah risk management processes and tools. The policy and guidelines serve to provide a consistent group-wide framework for managing SNCR across the Group.

In addition to this, the Group Risk Loss Event Management and Reporting ("RLEMR") Guideline provides sound mechanism on Shariah non-compliance ("SNC") management and reporting, in order to ensure the Group strictly complies with Shariah rules and principles, as well as the regulatory requirements. The guideline has been established to be in line with the mechanism set out by BNM's Operational Risk Reporting Requirement – Operational Risk Integrated Online Network ("ORION") and to ensure compliance with section 28(3) of the IFSA 2013 which requires any SNC event to be immediately reported to BNM. Additionally, pursuant to this guideline, any actual SNC events caused by operational lapses including negligence, breach of policies and lack of due care by staff may be subject to disciplinary action.

Being part of operational risk, Shariah risk management leverages on the same ORM principles, processes, and tools. The responsibility of managing SNCR is spearheaded by the Group's Shariah Risk Management Unit ("SRMU"). In general, all ORM tools are extended to the process of managing SNCR. However, the tools are modified to suit the regulatory requirements on Shariah governance in order to provide a robust and consistent approach in managing SNCR.

## **8. Shariah Governance (continued)**

### **8.2 Shariah Risk Management (continued)**

Extensive and continuous Shariah risk awareness initiatives have been conducted for the Group's staff and Risk Controllers ("RC") to ensure understanding towards Shariah requirements/ rulings, effective identification of SNC risks, establishment of controls to prevent SNC event, and to keep updated on the latest Shariah requirements/ rulings issued by Shariah Division, SSC and regulators, and any occurrence of Shariah non – compliance event. In the year 2022, five (5) Shariah risk awareness sessions were conducted involving Bank's staff from HQ and branches. In addition, it is compulsory for all staff to participate in Shariah training via e-Learning as a refresher course.

### **8.3 Shariah Non-Compliance ("SNC") Events**

An SNC event is a result of the Group's failure to comply with the Shariah rules and principles as determined by the Bank's Shariah Supervisory Council, as well as other relevant body or institution such as the Shariah Advisory Council of BNM, Securities Commission and Labuan Financial Services Authority.

Throughout the year 2022, there were three (3) incidences of SNC events, whereby the events were related to improper execution of aqad for deposit-based product, granting of financing facilities to a company with SNC activities and absence of commodity trading for Tawarruq-based deposit. To prevent similar recurrence, the Group is continuously improving its Shariah compliance culture through the issuance of reminders, conducting on-going awareness trainings, as well as establishing additional controls to ensure compliance with Shariah requirements.

### **8.4 Shariah Non-Compliant Income**

31 December 2022	31 December 2021
RM 39,312.59	RM 41,182.96

The main contributors of the SNC income for 2022 were commissions from SNC merchants of card business (RM22,055.73) and commissions from third party investment product offering (RM17,132.03). The amount was disposed to charitable causes upon SSC's approval.

All SNC events and rectification plans were presented and approved by the Board/ SSC and reported to BNM in accordance with the prescribed reporting requirement by the regulator.

## 9. Investment Account

### 9.1 Overview

Islamic Financial Services Act 2013 (“IFSA”) distinguishes Investment Account (IA) from Islamic deposits, where Shariah contracts that need to be applied for IA products are non-principal guaranteed, while Shariah contracts for deposit products are principal guaranteed.

In line with the implementation of the IFSA, the Group has developed investment account products based on Mudarabah and Wakalah contracts.

Mudarabah is a contract between a customer as capital provider and the Group as an entrepreneur under which the customer provides capital to be managed by the Group and any profit generated is shared according to a mutually agreed profit-sharing ratio (PSR) whilst financial losses are borne by the customer provided that such losses are not due to the Group’s misconduct, negligence or breach of specified terms.

Wakalah refers to a contract where a customer, as the principal, authorizes the Group as his agent to perform a particular task on matters that may be delegated i.e., investment, with or without imposition of a fee. In this context, the Shariah contract applied is Wakalah bi al-Istithmar (Wakalah for the purpose of investment).

In terms of offering, the Group currently has the following two categories of IA:

Unrestricted Investment Account (UA)	Restricted Investment Account (RA)
Unrestricted Investment Account refers to a type of IA where the customer/Investment Account Holder (IAH) provides the Bank with the mandate to make the ultimate investment decision without specifying any particular restrictions or conditions.	Restricted Investment Account (RA) refers to a type of IA where the IAH provides a specific investment mandate to the Bank such as purpose, asset class, economic sector and period for investment.

The Bank will apply risk management controls over portfolio, legal and operational activities; including asset allocation, liquidity adherence to investment objectives and parameters, valuation, monitoring performance, Shariah compliance and others as per guided in the Bank Negara Malaysia (BNM)’s Investment Account Policy. Notwithstanding the above, in times of adversity in the markets, the Bank may manage its asset allocation to safeguard the investment portfolio provided that such investment is within the investment objectives of the fund.

IA product is not capital guaranteed and is not protected by the Perbadanan Insurans Deposit Malaysia (PIDM). Among the risks associated with IA include but not limited to the following:

- (a) Risk of Capital Loss - refers to the potential decrease in the value of the original investment amount.
- (b) Market Risk - refers to the potential impact of adverse price on the economic value of an asset.
- (c) Liquidity Risk - refers to the potential inability of the Bank to meet short term withdrawal demands from the IAH.

**9. Investment Account**

**9.1 Overview (continued)**

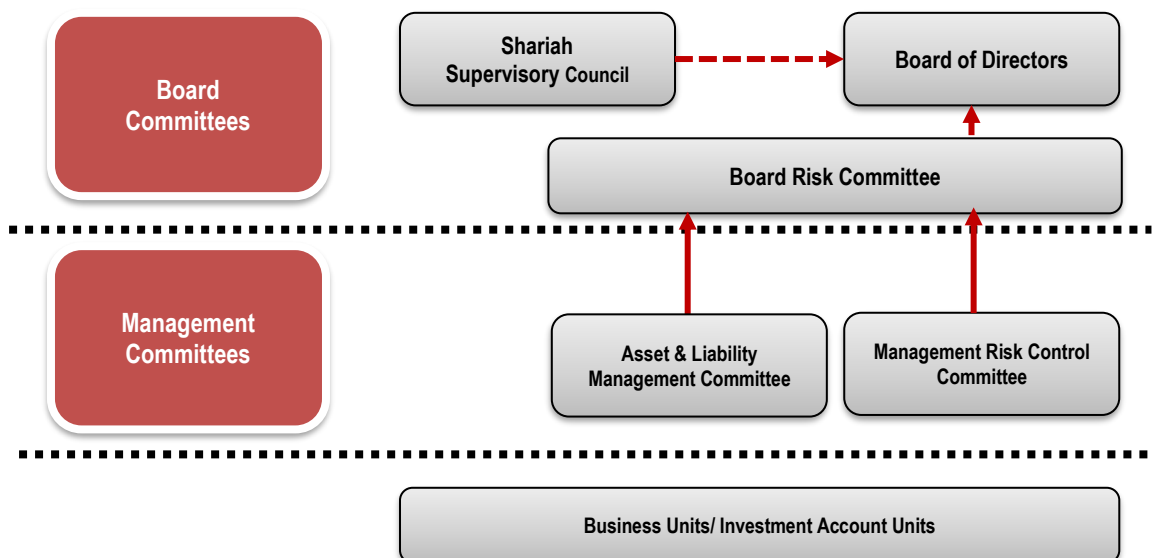

(d) Credit Risk - refers to the potential event that may arise when substantial amount of assets for the fund goes into default.

(e) Legal Risk - IAH should ensure that, in entering into this investment it is not in breach of any laws, regulations, contractual or any other legal limitations that may apply to investors. This investment is issued subject to all applicable laws, regulations and guidelines. In the event of change in such laws, regulations or guidelines, Bank Islam may be obliged to change some or all the terms and conditions of the investment, including the possibility of an early termination.

(f) Shariah Non-Compliance Risk - refers to the possible failures to comply with the rulings of BNM's Shariah Advisory Council (SAC) and standards on Shariah matters issued by BNM or decisions or advice of Bank Islam's Shariah Supervisory Council.

**9.2 Governance Structure**

To safeguard the IAH's interest, the investment mandates, strategies and parameters are carried out in accordance with the Group's governance set-up. The IA governance structure adopted by the Group is as depicted in the following diagram:

**BANK ISLAM MALAYSIA BERHAD  
PILLAR 3 DISCLOSURE  
AS AT 31 DECEMBER 2022**

**9. Investment Account (continued)**

**9.2 Governance Structure (continued)**

The roles and responsibilities of the above respective committees are as follows:

Committee	Responsibility
Board of Directors (Board)	Responsible to establish an effective governance arrangement to facilitate effective monitoring and control of the overall management and conduct of the IA. The adequacy of the governance arrangement shall be commensurate with the nature, scale, complexity, and risk profile associated with the conduct of the IA.
Board Risk Committee (BRC)	Assists the Board in performing independent oversight and provides recommendations in respect of the management, operations, and performance of the IA, as well as to play the role of Board Investment Committee.
Shariah Supervisory Council	Advises and provides clarification on relevant Shariah rulings, decisions, or policies on Shariah matters and endorses the terms and conditions stipulated in IA documentation and ensures that information published is in compliance with Shariah.
Management Risk Control Committee	Assists BRC in performing independent oversight and provides recommendations in respect of the management, operations, and performance of the IA.
Asset & Liability Management Committee	<ul style="list-style-type: none"> <li>• Responsible to perform the oversight function and to deliberate key issues related to the Bank's asset and liability management and market risk.</li> <li>• Approves and reviews proposals with regard to acquisition, allocation and management of funds to be consistent with the regulatory requirements, liquidity needs and market factors, and also other matters which are market and liquidity risk related and where necessary, making recommendations to the Board Risk Committee and/or the Board.</li> </ul>
