As at the LPD, and pursuant to the revised payment terms of the cash consideration as set out above, the Group has paid a total sum of RM8.00 million (being Payment 1, Payment 2 and Payments 4 to 6) to Tree Technologies via its internally generated funds.

The Group intends to use RM13.50 million to be raised from the Proposed Private Placement to reimburse (Payment 1, Payment 2 and Payments 4 to 6, which have been paid via the Group's internally generated funds) and settle the remaining cash payment in respect of the Gebeng Land Acquisition.

(ii) Expansion and investment in existing businesses

The Group intends to allocate proceeds of up to RM18.50 million to be raised from the Proposed Private Placement to fund the following investment / collaboration / project in respect of its existing businesses:

- (i) on 11 August 2025, Citaglobal Renewable Energy Sdn Bhd ("**Citaglobal RE**"), a wholly-owned subsidiary of the Company, entered into 2 conditional share sale agreements for the acquisition of 70% equity interests in Zeqna Corporation Sdn Bhd ("**Zeqna**") and Koridor Mentari Sdn Bhd ("**Koridor Mentari**") respectively for a total consideration of RM15.00 million ("**Small-Hydro Acquisitions**"). Zeqna and Koridor Mentari are principally involved in the development and operations of power generation facilities utilising renewable sources such as solar and other renewable energy projects.

As at the LPD, Zeqna owns and operates a hydro energy generating facility with an installed capacity of 6.00 Megawatt (MW) located in Slim River, Perak whereas Koridor Mentari is undertaking the development of a 6.00 MW hydro energy generating facility located in Kampar, Perak. The estimated total construction cost of the Koridor Mentari's 6.00 MW hydro energy generating facility is approximately RM110.00 million, which shall be funded via a combination of the proceeds from the Proposed Private Placement, internally generated funds and/or bank borrowings. As at the LPD, the said construction is approximately 40% completed and the hydro facility is expected to commission by 2029.

The said acquisitions are expected to be completed by second half of 2026 and will allow the Company to secure controlling interest in Zeqna and Koridor Mentari and gain access to the hydropower assets held by these companies. Upon completion of the said acquisitions, the Group will own 70% equity interests in Zeqna and Koridor Mentari, while the remaining 30% equity interests will be held by Perak Hydro Renewable Energy Corporation Sdn Bhd, an indirect 60%-owned subsidiary of G Capital Berhad.

- (ii) On 4 September 2025, the consortium comprising Abu Dhabi Future Energy Company PJSC, Citaglobal RE and TIZA Global Sdn Bhd ("**Consortium**") accepted a letter of notification from the Energy Commission Malaysia notifying that the Consortium had been selected as a shortlisted bidder for the development of a large scale solar (LSS) photovoltaic plant of 200MW in Cherah Dam, Kuantan under the LSS PETRA 5+ programme ("**Solar Project**").

Subsequently in December 2025, the special purpose vehicle incorporated by the Consortium, namely Chereh Solar Sdn Bhd (30% held by Citaglobal RE), had entered into a 21-year power purchase agreement with Tenaga Nasional Berhad in relation to the sale of electricity generated by the Solar Project.

As at the LPD, the Consortium is in the process of obtaining the necessary permits and approvals for the Solar Project. The construction for the Solar Project is expected to commence by October 2026 and expected to be completed by March 2028. The total estimated cost for the development of the Solar Project is approximately RM800.00 million, which shall be funded via a combination of the proceeds from the Proposed Private Placement, internally generated funds, funding by the other Consortium parties, and/or bank borrowings.

- (iii) On 6 October 2025, Citaglobal Bioenergy Sdn Bhd (“**Citaglobal Bioenergy**”), an indirect wholly-owned subsidiary of the Company, entered into a joint development agreement with Keppel Decarb (Malaysia) Sdn Bhd to collaborate on bio-compressed natural gas (Bio-CNG) upgrading facility related projects in Malaysia (“**Project**”).

As at the LPD, Citaglobal Bioenergy is in the process of finalising the commercial agreements for the Project. The construction of the Project is expected to commence in the 1st quarter of 2027. The Project will be developed in phases, with full rollout expected to be completed by 2031. The total estimated cost for the development of the Project is approximately RM240 million, which shall be funded via a combination of the proceeds from the Proposed Private Placement, internally generated funds, funding by the joint venture partner and/or bank borrowings.

The fundings required for the abovementioned investments / projects are envisaged to comprise among others, the acquisition costs, development and construction costs, professional and consultancy fees, feasibility studies and other costs incidental to the implementation of the investments and projects. In this regard, the Group intends to allocate approximately RM18.50 million from the Proposed Private Placement to fund these investments and projects.

At this juncture, the proceeds from the Proposed Private Placement have not been specifically earmarked for any particular investments / projects, and it will be based on the actual funding requirement of the respective investments / projects at the relevant time. In this respect, the allocation of proceeds between each investments / projects shall be adjusted accordingly as and when required.

Notwithstanding the above, the Group may also utilise the proceeds from the Proposed Private Placement to fund future expansion, investments, projects and / or contracts within its existing businesses and related sectors, including but not limited to renewable energy, environment, telecommunications, property development, civil engineering and construction and other complementary businesses, as and when such opportunities arise. In such instance, the Company will make the necessary announcement on Bursa Securities in accordance with the relevant provisions of the Listing Requirements.

(iii) Working capital

The Group intends to use RM8.60 million of the proceeds to be raised from the Proposed Private Placement to support working capital requirements of the Group. These consist of operating and administrative expenses for the day-to-day operations of the Group such as payment of staff salaries, utilities, purchase of materials upkeep and maintenance as well as payment to trade and other creditors, the actual breakdown of which cannot be determined at this juncture as it will depend on the actual requirements of the Group at the relevant time.

The estimated breakdown of the allocation of proceeds for working capital is as follows:

Working capital	Percentage allocation %	Amount RM'000
Staff costs	67.00	5,762
Other operating and administrative expenses	33.00	2,838
Total		8,600

(iv) Estimated expenses for the Proposed Private Placement

The breakdown of the estimated expenses for the Proposed Private Placement is illustrated as follows:

	Amount RM'000
Professional fees ⁽¹⁾	1,261
Fees to relevant authorities	50
Miscellaneous expenses and contingencies	180
Total	1,491

Note:

(1) These include advisory fees, introducer fee and other professional fees payable to the Principal Adviser, Financial Adviser, company secretary and share registrar in relation to the Proposed Private Placement.

Any variation in the actual amount of expenses above will be adjusted to / from the proceeds allocated for working capital.

3. RATIONALE FOR THE PROPOSED PRIVATE PLACEMENT

Upon evaluating the funding requirements for the purposes as set out in **Section 2.6, Part A** of this Circular, the Board is of the view that capital fund raising via the Proposed Private Placement will provide the necessary funding on an immediate basis.

After due consideration of the various methods of fund raising (such as bank borrowings and rights issue exercise), the Board is of the opinion that the Proposed Private Placement is currently the most appropriate avenue of fund raising as it enables the Group to raise funds expeditiously without incurring interest cost or having to service principal repayments as compared to bank borrowings, thereby allowing the Group to preserve its cash flow.

On the other hand, other fund-raising exercises such as a rights issue may not be suitable as it will involve a cash call from existing Shareholders. Moreover, it will also require the Company to identify certain Shareholders to provide irrevocable undertakings to subscribe for a minimum number of rights shares or, alternatively, procure underwriting arrangements (which will incur additional cost), to achieve a minimum subscription level. In addition, a rights issue exercise is likely to take a longer time to complete as compared to a private placement exercise.

Equity fund-raising exercises undertaken by the Company in the past 12 months

Save as disclosed below, the Company has not undertaken any equity fund-raising exercises in the past 12 months prior to the date of the announcement in relation to the Proposed Private Placement:

On 16 May 2025, the Company completed the bonus issue of 85,094,851 Warrants C on the basis of 1 Warrant C for every 5 existing Shares held by entitled shareholders.

The Company did not raise any funds from the bonus issue of Warrants C above as the Warrants C were issued at no cost to the entitled shareholders. The proceeds that may be raised by the Company from the exercise of the Warrants C would depend on the actual number of Warrants C exercised during the exercise period.

As at the LPD, none of the Warrants C have been exercised.

4. INDUSTRY OVERVIEW, OUTLOOK AND PROSPECTS

4.1 Overview and outlook of the Malaysian economy

The Malaysian economy advanced by 6.3% in the fourth quarter of 2025 (third quarter of 2025 (“**3Q 2025**”): 5.4%), driven mainly by domestic demand. Growth in household spending was higher, driven by positive labour market conditions and income-related policy support. The strong investment growth was underpinned by stronger machinery and equipment spending, particularly for data centres, and ongoing implementation of multi-year projects by both the private and public sectors. In the external sector, exports continued to strengthen, led mainly by stronger exports of electrical and electronics (“**E&E**”) goods. Inbound tourism and information and communication technology (“**ICT**”)-related services also contributed to services exports growth and surplus in the current account balance. Meanwhile, imports remained strong driven by the rebound in intermediate goods to support economic activity and productive capital-related goods reflecting the realisation of ongoing investment projects.

On the supply side, growth was mainly accounted for by the expansion in the services and manufacturing sectors. Higher growth in the services sector was mainly driven by consumer-related subsectors, government services as well as ICT subsector following the operationalisation of data centres. In the manufacturing sector, performance was driven by stronger production in the E&E sub-sector induced by higher demand from the global technology expansion, alongside the increased output of consumer-related goods. Meanwhile, the agriculture sector strengthened, reflecting higher growth for palm oil amid less severe floods compared to last year. On a quarter-on-quarter, seasonally-adjusted basis, growth expanded by 0.8% (3Q 2025: 2.7%).

Bank Negara Malaysia Governor Dato’ Sri Abdul Rasheed Ghaffour says, ‘Malaysia’s economy grew by 5.2% in 2025, on account of strong domestic demand and favourable exports, exceeding the forecast range of 4% - 4.8%. This growth momentum is expected to continue in 2026, supported by resilient domestic demand and exports.’

Going forward, headline inflation is expected to remain moderate in 2026 amid the continued easing in global cost conditions. The modest commodity price outlook would help to contain cost pressures on inflation. Core inflation is expected to remain broadly stable and close to its long-term average in 2026, reflecting continued expansion in economic activity and the absence of excessive demand pressures. The domestic policy reforms implemented in 2025, such as the Sales and Service Tax (SST) expansion and targeted RON95 subsidy rationalisation, are projected to result in only modest effects on inflation in 2026.

4.2 Overview and outlook of the construction industry in Malaysia

The construction sector is expected to remain stable in 2026 with a projected growth of 6.1%, underpinned by positive performance across all subsectors. The realisation of approved strategic investments under national policies and commencement of projects under the Thirteenth Malaysia Plan, will further support the sector's performance. Within the subsectors, major infrastructure and utilities development such as LRT Mutiara Line, Hybrid Hydro Floating Solar and ASEAN Power Grid will steer the civil engineering subsector's performance. In addition, the non-residential buildings subsector is anticipated to be driven by sustained demand for industrial facilities, logistics hubs and data centres, in line with the expansion of high technologies as well as digitalisation. Meanwhile, the residential buildings subsector is expected to benefit from government-led affordable housing programmes and targeted home ownership initiatives supported by policy measures under the Thirteenth Malaysia Plan as well as new projects by private sectors. On the other hand, specialised construction activities subsector is projected to grow in tandem with other subsectors' performance supported by sustained demand for site preparation, mechanical and electricals, as well as finishing works.

4.3 Overview and outlook of the property industry in Malaysia

The real estate and business services subsector is projected to grow by 6.7%, driven by sustained demand for professional services. The growth is expected to be spurred by engineering-related services, benefiting from increased demand for logistic hubs, warehouses and ongoing development of industrial parks. This expansion is also anticipated to be fuelled by new demand from key projects, including the Johor-Singapore Special Economic Zone and continuous construction activities for new data centres.

4.4 Overview and outlook of the renewable energy industry in Malaysia

Malaysia is committed to low-carbon development aimed at restructuring the economic landscape to a more sustainable one. In this context, the National Energy Transition Roadmap ("NETR") sets the goal to accelerate energy transition and change the way energy is generated to improve climate resilience. NETR has developed the Responsible Transition ("RT") Pathway 2050 to shift Malaysia's energy systems from fossil fuel-based to greener and low-carbon systems. The Total Primary Energy Source ("TPES") modelling indicated that our energy demand will increase marginally at 0.2% annually from 95 million tonnes of oil equivalent ("Mtoe") in 2023 to 102 Mtoe in 2050. The RT Pathway 2050 has also shown promising decarbonisation results as evidenced by the phasing out of coal and the reduction of fossil-fuel reliance from 96% in 2023 to 77% in 2050. Natural gas is set to be not only a transitional fuel, but also the primary contributor of TPES at 57 Mtoe (56%) followed by renewables that include solar, hydro and bioenergy, which collectively contribute 23% of TPES in 2050 from a mere 4% in 2023.

Malaysia has substantial renewable energy ("RE") resources, with almost 290 GW of technical potential estimated across the country. Solar photovoltaic ("PV") technical potential alone is estimated to reach 269 gigawatts ("GW"). Just a small fraction of this RE potential has yet been realised, with just over 9 GW of installed capacity, and greater than 95% untapped technical potential.

Over the last decade, the Government of Malaysia has established programmes and supporting policies to catalyse rollout of RE technologies. These programmes have helped stimulate significant RE growth over the past decade. Since 2011, solar PV remains the most encouraging segment of the national RE landscape with an installed capacity compound annual growth rate of 48%, expanding from 0.1 GW to 2.6 GW.

Malaysia has also established itself as a major international hub for solar PV components manufacturing, building a globally recognised green energy industry. 6 out of 10 of the world's largest solar PV companies operate in Malaysia, listing Malaysia as one of the top exporters in the global solar PV industry.

NETR outlines several key observations for the dynamics of Malaysia's power mix as the nation progresses along this pathway:

- Renewables will constitute the majority share of installed capacity by 2050. However, the contribution of RE to the total generation mix will be comparatively lower than fossil fuels, particularly natural gas. This reflects the inherent low-capacity factor associated with solar, compared against the high-capacity factor of gas.
- The share of coal-fired power generation is expected to ramp down over time, driven by natural retirement timelines of existing coal-fired power plants. No new coal-fired power generation will be developed, leading to almost complete phase out by 2045.
- Gas is expected to act as a lower-carbon transition fuel away from baseload coal, and will be the dominant source of fuel for baseload power.
- The ambition to achieve 70% RE share of installed capacity by 2050 is expected to be achieved, predominantly driven by solar PV installation. Significant solar capacity growth is required in the next three decades, with 59 GW of installed capacity by 2050.

4.5 Overview and outlook of the manufacturing industry in Malaysia

Growth in the manufacturing sector is projected to remain steady at 3% in 2026, supported by both export- and domestic-oriented industries. The broader gains from the global technology upcycle is anticipated to continue supporting export-oriented industries. The E&E cluster is expected to remain the key driver, with sustained growth across semiconductor products, particularly in the chips segment, following robust demand for artificial intelligence (AI) applications and digitalisation. These developments will further elevate growth prospects and strengthen Malaysia's position in the global E&E supply chain.

Meanwhile, domestic-oriented industries will be supported by higher output, attributed to stable investment and consumption activities as well as concerted government efforts to boost local production. A surge in visitor arrivals and rising gastronomic activities are expected to increase output in the consumer goods segment, particularly food and beverages. Furthermore, Phase 2 of the Public Service Remuneration System (SSPA) implementation is anticipated to boost household spending. The transportation-related industries will also benefit from increasing logistics and travel activities.

4.6 Prospects of the Group

The business segments of the Group are energy, civil engineering and construction (“**CEC**”), property and manufacturing. The Group is currently embarking on various corporate proposals to improve the contributions from the energy, CEC and property segments in addition to the ongoing selective tender of projects to strengthen the financial performance of the Group.

As at 31 December 2025, the Group has a total outstanding order book of RM1.8 billion whilst the Group’s property segment has an estimated remaining gross development value of RM455 million.

The performance outlook of the Group shall be supported by the current position of orderbook and projects of the Group and may further be enhanced by any future award of contracts arising from the memorandum of understanding collaborations and tender participations by the Group from time to time.

In addition, the proposed development of the Gebeng Land into an eco-friendly industrial park is expected to enhance the Group’s property development portfolio and provide earnings visibility over the development period. The development is expected to generate development profits to the Group and may also provide opportunities for the Group to cross-sell its products and services as part of the development, including the incorporation of green elements and technologies within the industrial park.

Apart from the above, the Group is also expanding its participation in the energy segment through various initiatives including renewable energy projects. In view of the increasing focus on renewable energy development and energy transition initiatives in Malaysia, the Group believes that its participation in renewable energy projects may enable the Group to capture potential opportunities within the energy sector and further diversify its revenue streams moving forward.

Upon securing the applicable building plan approvals, the construction period is expected to take a minimum of 48 months, based on the technical requirements and construction programme of the development plan submitted to DBKL.

2.4 Details of the Proposed JV

The Proposed JV entails Citaglobal Property Development contributing the Land and granting Varia Crest the exclusive and irrevocable right to plan, develop, construct, market and sell the Development for the entire Development period via the POA.

In consideration of Citaglobal Property Development contributing the Land for the Proposed JV, Citaglobal Property Development is entitled to the following:

- (i) RM7.30 million payable by Varia Crest within 7 days from the date of the JVA, which has been paid by Varia Crest directly to BIMB at the instruction of Citaglobal Property Development to settle the balance payment to BIMB for the Land Acquisition;
- (ii) Total amount of RM58.40 million payable by Varia Crest to BIMB in accordance with the repayment schedule for the Land Acquisition Loan;
- (iii) the Entitled Office Space;
- (iv) RM7.30 million payable by Varia Crest by way of consideration in-kind, which will be proposed by Varia Crest and mutually agreed by Citaglobal Property Development and Varia Crest at a later date. Subject to further negotiations between the parties, the potential consideration in-kind could be in the form of fixtures and fittings of the Entitled Office Space; and
- (v) Citaglobal Property Development shall be granted the opportunity to participate in the sale of the Development. Upon Citaglobal Property Development achieving a minimum aggregate unit sale of 30% under the Development, Citaglobal Property Development shall be entitled to 50% of net premium of units sold by Citaglobal Property Development under the Development, where net premium represents the excess of Citaglobal Property Development's actual selling price over the agreed base selling price, after taking into account applicable adjustments and allowable costs ("**Profit Uplift**").

(collectively, the "**Citaglobal Property Development Entitlement**").

Save for the Entitled Office Space, all developed/completed units under the Development, including all subsequently unsold units (if any), shall be registered in the name of Varia Crest.

Other than the Citaglobal Property Development Entitlement, Citaglobal Property Development is not entitled to any other profit sharing arrangements under the Proposed JV, and all profit arising from the Development shall be fully attributable to Varia Crest.

Obligations of Citaglobal Property Development pursuant to the JVA

Pursuant to the JVA, the obligations of Citaglobal Property Development include, amongst others, the extension of lease period of the Land, and the removal of the express condition on the Land for bank premises purpose.

The removal of the express condition was undertaken by BIMB as part of the conditions precedent under the Land SPA, which was completed on 29 December 2025.

The premium for the extension of the lease is estimated at approximately RM2.90 million and is payable by Citaglobal Property Development. Citaglobal Property Development intends to submit the application for the lease extension upon obtaining Shareholders' approval for the Proposed JV at the forthcoming EGM.

In the event the lease is not extended by the authorities, the Development may potentially be impacted, particularly affecting the marketability, pricing, and sales performance, which may in turn impact overall returns of the Development and eventually the value of the Entitled Office Space.

Notwithstanding the above, Citaglobal Property Development will take all necessary measures and work closely with the relevant authorities to obtain the approval for the lease extension.

The salient terms and conditions of the JVA are set out in **Appendix II** of this Circular.

2.5 Basis and justification of arriving at the Citaglobal Property Development Entitlement

The estimated Citaglobal Property Development Entitlement is approximately RM118.00 million, comprising the following:

	Citaglobal Property Development Entitlement	Amount/Estimated value (RM' million)
(i)	Cash payment by Varia Crest within 7 days from the date of the JVA	7.30
(ii)	Total amount payable by Varia Crest to BIMB in accordance with the repayment schedule for the Land Acquisition Loan	58.40
(iii)	Estimated value of the Entitled Office Space	⁽¹⁾ 45.00
(iv)	Consideration in-kind as proposed by Varia Crest	7.30
	Total	118.00

Note:

(1) *Estimated based on RM900 per square foot of 50,000 square feet net floor area of the Entitled Office Space, based on the market study on potential developments on the Land conducted by Intra Harta in November 2024 for the Company's internal evaluation.*

The estimated Citaglobal Property Development Entitlement of RM118.00 million as set out above does not include the potential Profit Uplift outlined in **Section 2.4(v), Part B** of this Circular, which could not be quantified at this juncture.

The estimated Citaglobal Property Development Entitlement of approximately RM118.00 million (excluding the Profit Uplift which could not be quantified at this juncture) was arrived at on a willing buy willing seller basis, and after considering the Total Land Investment Costs of RM91.27 million.

In addition, the Citaglobal Property Development Entitlement is higher than the market value of the Land of RM78.00 million as appraised by Intra Harta, and was derived after taking into consideration the prospects of the Land and the Development as set out in **Section 5.3, Part B** of this Circular, and potential value appreciation of the Entitled Office Space as well as the Profit Uplift to Citaglobal Property Development.

2.6 Liabilities to be assumed

Save for the obligations arising from the JVA, as set out in **Section 4 of Appendix II** of this Circular, there are no liabilities including contingent liabilities and guarantees, to be assumed by Citaglobal Group arising from the Proposed JV.

2.7 Additional financial commitment

Citaglobal Group is not expected to incur any other additional financial commitment in respect of the Proposed JV. Varia Crest is responsible for all funding required for the Development.

3. UTILISATION OF PROCEEDS

As part of the Citaglobal Property Development Entitlement, Citaglobal Property Development is entitled to the following cash payments:

- (i) RM7.3 million from Varia Crest within 7 days from the date of the JVA, which has been paid by Varia Crest directly to BIMB at the instruction of Citaglobal Property Development to settle the balance payment to BIMB for the Land Acquisition; and
- (ii) RM58.4 million payable by Varia Crest to BIMB in accordance with the repayment schedule for the Land Acquisition Loan.

4. RATIONALE FOR THE PROPOSED JV

The Proposed JV enables Citaglobal Group to unlock the value of the Land, converting it into a high-value mixed-use development.

The Proposed JV combines Citaglobal Group's strategic land contribution with Varia Group's proven capabilities in property development, project management, financing, and marketing, thereby enabling both parties to optimise resource allocation and project delivery.

The Proposed JV - *Citaglobal Tower* Development, is expected to optimise land utilisation through joint participation in a high-value, sustainable urban development, while leveraging the technical, financial and market expertise of both Citaglobal Group and Varia Group to ensure effective execution and delivery. The Proposed JV is anticipated to contribute positively to the future earnings and NA value of Citaglobal Group, reinforcing its presence in the Greater Kuala Lumpur property market. In addition, the collaboration is expected to strengthen the long-term partnership potential between Citaglobal Group and Varia Group through continued cooperation in future developments.

The *Citaglobal Tower* Development is aligned with Citaglobal Group's strategic vision to expand its property and infrastructure portfolio through sustainable and high-impact projects that create value for the Shareholders. Its entitlement to the Entitled Office Space and potential upside participation in project profitability would contribute positively to the Group's financial performance and financial position.

The *Citaglobal Tower* Development's prime location along Jalan Tun Razak, Kuala Lumpur positions Citaglobal Group to capitalise on one of Kuala Lumpur's most prominent corridors, enhancing the Group's brand visibility and long-term property development footprint in the central Kuala Lumpur business district.

5. INDUSTRY OVERVIEW, OUTLOOK AND PROSPECTS

5.1 Overview and outlook of the Malaysian economy

Malaysia's economy expanded by 6.3% in the fourth quarter of 2025, bringing full-year growth to 5.2%, which exceeded earlier projections. The stronger performance was primarily driven by sustained domestic demand, supported by higher household spending, continued investment activity and steady expansion in exports of goods and services. Labour market conditions remained favourable, contributing to stable income growth and supporting private consumption.

Inflationary pressures remained contained during the quarter. Headline inflation averaged approximately 1.3%, broadly unchanged from the preceding quarter, while core inflation moderated overall despite some category-specific price adjustments. The stability in prices was supported by lower administered prices and easing global cost pressures. Inflation for 2025 as a whole remained manageable, reflecting balanced demand conditions and well-anchored inflation expectations.

Financial conditions during the quarter were supportive of economic activity. The Malaysian ringgit appreciated against major currencies, reflecting improved domestic fundamentals and external developments. Credit to the private non-financial sector continued to expand, underpinned by sustained business financing and household borrowing activity. The banking system remained well-capitalised with adequate liquidity to support ongoing economic growth.

Looking ahead, Bank Negara Malaysia ("**BNM**") expects Malaysia's economic expansion to be sustained, supported by resilient domestic demand and continued investment activities, while inflation is projected to remain moderate. Notwithstanding this positive outlook, the central bank continues to monitor external developments and global financial conditions that may pose risks to growth and price stability.

5.2 Overview and outlook of the property market in the Klang Valley

The Klang Valley property market is expected to remain resilient yet selective heading into 2026, underpinned by Malaysia's stable macroeconomic outlook, improving labour market conditions and supportive monetary policies. Demand across asset classes is increasingly quality-driven, with occupiers, investors and buyers prioritising well-located, future-ready developments with strong sustainability credentials and long-term value potential.

The residential market in the Klang Valley continues to exhibit mixed but stable performance, supported by sustained demand from first-time buyers, young families and urban professionals, particularly within the affordable to mid-range segments. High-rise residential properties have gained traction due to relatively lower entry prices and urban supply, while landed properties remain constrained by affordability and limited availability in prime areas. Buyer sentiment remains cautious, with increased selectivity and price sensitivity, particularly for units above RM1.0 million, where overhang remains concentrated. Looking ahead, the market is expected to undergo a period of realignment rather than rapid expansion, with demand anchored by affordability and supported by infrastructure-led growth in peripheral areas such as Rawang, Semenyih and Sepang. Developers are expected to adopt a more disciplined approach, focusing on right-sized developments, integrated townships and ESG-aligned features to remain competitive.

The Klang Valley office market is undergoing a structural shift towards quality and sustainability, characterised by a strong “flight-to-quality” trend. Demand is increasingly concentrated in Grade A and green-certified buildings, driven by occupiers’ focus on operational efficiency, ESG compliance and workplace experience. Prime office assets continue to record improving occupancy rates and stable rental growth, while older non-prime buildings face rising vacancy pressures and longer leasing cycles. This has widened the performance gap within the sector and accelerated the need for refurbishment and adaptive reuse of ageing office stock. Moving into 2026, the office market is expected to remain tenant-favourable but selective, with rental growth concentrated in high-quality, well-located assets. Sustainability features and experiential workplace design are expected to become key determinants of long-term competitiveness and asset value.

The retail sector in the Klang Valley continues its post-pandemic recovery, albeit at a more moderate pace. Performance remains polarised, with prime retail centres maintaining high occupancy and steady rental growth, supported by strong footfall and curated tenant mixes. In contrast, older and underperforming malls continue to face elevated vacancy levels, prompting landlords to reposition assets through mixed-use concepts and experiential offerings. Leasing demand remains concentrated in food and beverage, fashion and entertainment segments, reflecting evolving consumer preferences towards “retailtainment” and lifestyle-driven experiences. Looking ahead, the retail market is expected to retain a two-tier structure, with prime, experience-led malls demonstrating resilience, while secondary assets will require active repositioning to remain relevant amid cautious consumer spending and ongoing cost-of-living pressures.

In summary, the Klang Valley property market in 2026 is expected to be stable but highly selective, with growth concentrated in well-positioned, high-quality assets across residential, office and retail segments. The increasing emphasis on ESG integration, infrastructure connectivity and user-centric design will continue to shape market dynamics and investment decisions going forward.

5.3 Prospects of the Land and the Development

The Land enjoys a highly strategic location just outside the Kuala Lumpur Golden Triangle, providing strong visibility, dual road frontage and transit connectivity that make it suitable for a landmark development. Public transport upgrades, including LRT3 and MRT3, will enhance accessibility and strengthen its long-term positioning.

The site is designated as “Main Commercial” with a high base plot ratio and potential for additional density through Transit Incentive Zone provisions, offering substantial development flexibility. Despite the limited number of surrounding commercial buildings, this allows any new project to stand out competitively and secure a branding advantage.

Based on market study on potential development on the Land, market conditions remain favourable, with continued developer confidence in central Kuala Lumpur, strong demand for mixed-use and serviced-apartment concepts. The concentration of healthcare institutions nearby also presents opportunities to target medical-related users and visitors, enhancing the depth of the potential market.

6. RISK FACTORS

6.1 Non-fulfilment of conditions precedent of the JVA

The JVA is conditional upon the fulfilment of the conditions precedent and obligations of the parties thereunder. In the event any of the conditions precedent under the JVA is not fulfilled and/or waived, the JVA and the Proposed JV may not be effected.

Notwithstanding the foregoing, the parties to the JVA will endeavour to take all reasonable steps to ensure the fulfilment of the conditions precedent and their respective obligations under the JVA. As at the date of this Circular, save for the approval of the Shareholders for the Proposed JV, all the remaining conditions precedent of the JVA have been fulfilled.

6.2 Completion and delay in completion of the Development

There is always a potential risk in implementing the Development due to various factors including the performance of the property market in Malaysia, increase in development and/or construction costs, unavailability of skilled manpower, delay in completion and obtaining approvals from the relevant authorities as well as securing adequate funding, and etc. leading to interruptions or delays in completing the Development by Varia Crest, which could consequently result in the delay of delivery of the Entitled Office Space to Citaglobal Property Development.

In this regard, the Group will take necessary measures to closely manage these risks through close monitoring of Varia Crest's performance via regular project updates at the monthly management consultative committee meetings, site meetings and progress reports to ensure Varia Crest's adherence to the agreed development timeline and specifications.

6.3 Property investment risk

Citaglobal Property Development's entitlement to the Entitled Office Space exposes the Group to risks inherent in property investment. The value and returns of the Entitled Office Space are subject to various factors, including but not limited to the performance of the property market in Malaysia, changes in economic conditions, interest rate fluctuations, competition from existing and upcoming developments, tenant preferences, regulatory changes, and overall investor sentiment, which may result in the Entitled Office Space not achieving the expected capital appreciation, and in turn result in lower-than-expected returns and could adversely affect the Group's assets value and profits arising from the Proposed JV.

To mitigate the abovementioned risks, the Group will undertake periodic assessments of the property's market value by monitoring prevailing property market conditions, comparable transactions and broader economic indicators. This is to enable the Group to better understand potential fluctuations in the value of the asset and to make informed decisions in relation to its financial planning, reporting and long-term asset holding strategy.

In addition, the Group will adopt prudent asset and financial management practices to preserve the value and utility of the Entitled Office Space, including ensuring proper maintenance, upkeep and optimal utilisation of the premises to support its operational needs. The Group will also retain flexibility to reassess its strategy in respect of the property, including potential repurposing, leasing to third parties, or monetisation, where appropriate, taking into consideration the Group's business requirements and prevailing market conditions.

6.4 Compulsory acquisition by the Government

The Government has the power to compulsorily acquire any land in Malaysia pursuant to the provisions of the applicable legislation, including the Land Acquisition Act 1960, for certain purposes, where the compensation to be awarded is based on the fair market value of a property, assessed according to the basis prescribed in the Land Acquisition Act 1960 and other relevant laws. Compulsory acquisition by the Government could adversely affect the value of the Land.

In the event of any compulsory acquisition of the Land, the Group will seek to minimise any potential losses from such situations by invoking the relevant provisions of the Land Acquisition Act 1960, in relation to the Group's rights to submit an objection to the compensation, where necessary.

CERTIFICATE OF VALUATION OF A VACANT PARCEL OF COMMERCIAL LAND LEGALLY IDENTIFIED AS LOT NO. 147 SEKSYEN 87, TITLE NO. PAJAKAN NEGERI 27027, LOCALITY OF JALAN TUN RAZAK, TOWN AND DISTRICT OF KUALA LUMPUR, WILAYAH PERSEKUTUAN KUALA LUMPUR

Based on the Valuation Working and the explanatory notes on the adjustments made to the adopted comparables, the adjusted values range from RM1,137 per square foot to RM1,511 per square foot.

After considering all factors of the above, Comparable No. 1 is adopted as the best comparable for the valuation. This is because it represents an actual arm's length transaction of the same property, and therefore fully reflects the physical, locational, and market characteristics of the subject property without the need for adjustments in respect of size, location, accessibility, express condition, tenure, or shape. Only minimal adjustments for time and zoning & plot ratio are required to align the transaction date and development potential with the valuation date. In addition, Comparable No. 1 is the most recent transaction and is located within the same immediate market environment, thereby providing the most direct and reliable reflection of current market sentiment. Compared to other comparables, which require multiple and more significant adjustments due to differences in tenure, size, express conditions, and locational attributes, Comparable No. 1 demonstrates the highest degree of comparability and lowest level of adjustment uncertainty.

Accordingly, Comparable No. 1 with adjusted value of RM1,137 per square foot is considered the most appropriate and reliable indicator of market value and is therefore adopted as the best comparable.

We are of the opinion that the Market Value of the subject property, based on RM1,137 per square foot is RM78,449,589 say **RM78,000,000**.
