However, the export revenue for the FYE 2017 has decreased by RM9.995 million or 23.34% as compared to the export revenue in the FYE 2016 of RM42.823 million or 97.09% of total revenue for the FYE 2016.

The decrease in export revenue was mainly attributable to the decrease in revenue in US market. Revenue contribution from US decreased by RM11.710 million or 36.53% from RM32.058 million in the FYE 2016 to RM20.348 million in the FYE 2017. The decrease was mainly due to lower revenue generated from our major customer in US, from RM21.040 million in the FYE 2016 to RM5.195 million in the FYE 2017, represents a decrease by RM15.845 million or 75.31% as compared to the FYE 2016. However, the impact was cushioned by revenue from other new customers in US secured during the FYE 2017.

On the other hand, there was increase in revenue from both Europe market and local market in FYE 2017. Revenue contribution from Europe market increased by RM1.770 million or 24.26% from RM7.296 million in the FYE 2016 to RM9.066 million in the FYE 2017 while local market contributed an increase in revenue by RM1.847 million or 143.74% from RM1.285 million in the FYE 2016 to RM3.132 million in the FYE 2017. The increase in sales to these markets was mainly contributed by new customers in UK and Malaysia.

CAPITAL STRUCTURE, RESOURCES AND EXPENDITURE

The overall capital management objective of our Group is to safeguard its ability to continue as a going concern so as to provide fair returns to shareholders of our Company. In order to meet this objective, our Group always strives to maintain an optimal capital structure to reduce the cost of capital and sustain its business development.

Our Group considers its total equity and total loans and borrowings to be the key components of its capital structure and may, from time to time, adjust the dividend payouts, issue new shares, sell assets, raise or redeem debts, where necessary, to maintain an optimal capital structure. Our Group monitors capital using a debt-to-equity ratio, which is calculated as total loans and borrowings divided by total equity.

Our primary sources of funds are mainly derived from the net cash generated internally from our operations and to a certain extent, external source of funds which comprises credit terms granted by our suppliers. The average credit terms granted to us ranges between 30 to 90 days. We may raise additional capital or funds through debt or equity offerings in the future to part finance our expansion plans or to meet our financing requirements should the need arise.

Our Board of Directors ("Board") is of the opinion that, after taking into consideration the funds to be generated from our business operations, the internal generated funds to our Group as well as the net proceeds raised from our Public Issue, our Group will have sufficient working capital for a period of twelve (12) months from the date of this Annual Report.

There are no legal, financial or economic restrictions on the ability of our subsidiary companies to transfer/receive funds to/from our Company in the form of cash dividends, loan or advances. In addition, as stated in our financial statements, our Group does not have bank borrowings as at the FYE 2017. Therefore, we are confident that we can meet our cash obligations.

Our Group manages capital spending in upgrading our existing machines to support our business growth cautiously. In the FYE 2017, we incurred minimum capital expenditures of RM0.078 million to support capacity expansion, innovation and cost efficiencies, which was much lower than RM1.175 million incurred in the FYE 2016.

RISK EXPOSURES

Our Group's financial position and results of operations have been and will continue to be affected by, amongst others, the following factors which may not be within our control:-

1. Impact of Foreign Currency Exchange Rates

We may be exposed to foreign currency exchange risks from the dealings with customers and suppliers as majority of our customers are primarily located overseas (i.e. Europe and US). Any significant change in foreign exchange rates may affect our Group's financial results.

To minimise its exposure to foreign currency exchange risks, our Group observes the movements in exchange rates and acts accordingly. Where necessary, our Group enters into derivative contracts to hedge the exposure.

Such exposure is also partly mitigated in the following ways:-

- (i) Our Group's foreign currency sales and purchases provide a natural hedge against fluctuations in foreign currencies; and
- (ii) Our Group maintains part of its cash and cash equivalents in foreign currency accounts to meet future obligations in foreign currencies.

2. Risk of dependency on major customer

Our Group are exposed to the risk of dependency on major customer. For both the FYE 2016 and FYE 2017, there was one (1) major customer that contributed 10% or more of our Group's total revenue. This major customer is a global semiconductor company whose product portfolio serves multiple applications within four primary end markets, namely wired infrastructure, wireless communications, enterprise storage, and industrial and others. The loss of this major customer may adversely impact our Group's operating results.

Although our Group are still exposed to the risk of dependency on major customer, the exposure was reduced significantly. The total revenue generated from this major customer was reduced by RM15.845 million or 75.31% from RM21.040 million or 47.70% of our Group's total revenue in the FYE 2016 to RM5.195 million or 14.45% of our Group's total revenue in the FYE 2017.

RISK EXPOSURES (CONT'D)

2. Risk of dependency on major customer (Cont'd)

Our future performance depends largely on how we maintaining our customer relationship with our major customer. As we do not have any long-term contracts with our customers and the majority of our sales are based on order-by-order basis, which is the norm in the industry. The major customer may also appoint additional companies as suppliers, in which case our business volume may decrease. If any of these events occur, our financial condition could be materially affected.

Despite the lack of formal long-term contracts, we have developed long-term business relationships with our major customer and we have been receiving repeat orders from the major customer. We will continuously strive to develop a good understanding of our major customer and customers' requirements and meet their expectations, ensuring continuity of business with them.

Meanwhile, we also continue to secure new customers to minimise our expose to the risk of dependency on major customer.

3. Competition Risk

Notwithstanding our competitive strengths, we continue to face competition from existing and prospective competitors which may be capable of offering similar products. Additionally, consolidation of market players within the industry may heighten the competition.

Whilst we strive to remain competitive, there can be no assurance that any changes in the competitive environment would not have any material and adverse impact on our business and financial performance.

The ability of a director to serve effectively as an Independent Director is very much dependent on his calibre, qualification, experience and personal qualities, particularly his integrity and objectivity, and has no real connection to his tenure as an Independent Director.

STATEMENT ON RISK MANAGEMENT AND INTERNAL CONTROL

Pursuant to Paragraph 15.26(b) of the Bursa Malaysia Securities Berhad
Main Market Listing Requirements

The Board of Directors (“Board”) of FoundPac Group Berhad is pleased to present this Statement on Risk Management and Internal Control (“Statement”), which has been prepared in accordance with the *Statement on Risk Management and Internal Control: Guidelines for Directors of the Listed Issuers* issued by Bursa Malaysia Securities Berhad.

BOARD RESPONSIBILITY

The Board affirms its overall responsibility for the FoundPac Group’s risk management practices and internal control system. The Board recognises that in order for the Group to meet its mission and objectives, as well as safeguarding shareholders’ interest, it is important to have a sound system of risk management and internal control which are embedded in all aspects of activities of the Group.

In making this Statement on Risk Management and Internal Control, the Board wishes to highlight that like any other system of controls, our risk management and internal control system have been designed to manage the Group’s risk to an acceptable level, within the risk appetite. The system can only provide reasonable, but not absolute assurance against material misstatement, loss or fraud. The risk management and internal control systems cover strategic, operational, financial and compliance objectives of the Group.

SENIOR MANAGEMENT AND KEY PERSONNEL OF THE GROUP

The senior management and key personnel of the Group are accountable to the Board for the implementation of the processes in identifying, evaluating, monitoring and reporting of risks and internal control. The Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”) have provided the Board the assurance that the Group’s risk management and internal control system are operating adequately and effectively, in all material aspects, to ensure achievement of corporate objectives.

RISK MANAGEMENT

During the financial year under review, the Group has formalised the risk management process of the Group through a Group Risk Management Framework.

Under this Framework, a Risk Management Committee (“RMC”) and a Risk Management Working Group (“RMWG”) have been formed.

The RMC, which consists of majority of independent directors, oversees the Group’s risk management process.

The RMWG, consisting of managers and key staff, has the main function of identifying and assessing business and compliance risks by employing the following methodologies:

- Identification of significant risks by the process owners
- Assessment of the likelihood and impact of the risks identified
- Evaluating the control strategies in relation to the risks
- Formulating action plan to address control deficiencies
- Setting Key Risk Indicators to monitor the risks

The RMWG reports to the RMC on a periodic basis. The RMC will then meet to discuss and evaluate the RMWG’s reports for adoption. Thereafter, the RMC will report to the Audit Committee about key risks and risk management activities carried out during that period. The Audit Committee will review the report and confirm that necessary actions have been or are being taken to remedy any significant failings or weaknesses identified.

INTERNAL CONTROL SYSTEM

Internal controls are embedded in the various work processes and procedures at appropriate levels in the Group. The Board maintains an organisational structure with clearly defined levels of responsibility and authority and appropriate reporting procedures.

The CEO, Chief Operating Officer (“COO”), CFO and senior management team are assigned with the responsibility of managing the Group. Key functions such as finance, tax, treasury, corporate, legal matters and contract awarding are controlled centrally by them. They are also accountable for the conduct and performance of the various business units. The CEO, COO, CFO and senior management team monitor the affairs of the business units through review of performance and operation reports and having regular management meetings with the heads of the business units to identify, discuss and resolve business, financial, operational, environmental, compliance and management issues. The meetings also serve as an excellent platform whereby the Group’s goals and objectives are communicated.

STATEMENT ON RISK MANAGEMENT AND INTERNAL CONTROL

Pursuant to Paragraph 15.26(b) of the Bursa Malaysia Securities Berhad Main Market Listing Requirements (Cont'd)

INTERNAL AUDIT

The Audit Committee is responsible for reviewing and monitoring the adequacy and effectiveness of the Group's system of internal control. The review and monitoring of the adequacy and effectiveness of the system of internal control are carried out through the internal audit function. In this respect, the Group has outsourced the internal audit function to an external independent professional consulting firm. The internal audit function assists the Audit Committee to achieve the following objectives:

- Review and assess the adequacy and effectiveness of the current internal control system and provide recommendations to improve on the existing control environment in relation to key business processes and risk management practices;
- Recommend opportunities for improving efficiency, effectiveness and economic aspects of the Group's operations; and
- Promote a system of internal control that is responsive to the dynamic and ever changing business environment, cost effective and sustainable.

The annual Internal audit plan is reviewed and approved by the Audit Committee prior to the commencement of internal audit review. The plan is developed based on the risk profile and analysis of the businesses of the Group, as well as on past experience. The internal audit will focus its resources on areas of high risks which will be audited more frequently than low risk areas.

For purposes of identifying and prioritising risks, the Internal Auditors will discuss with the RMC and the RMWG, review management reports and financial statements.

During the financial year under review, the Internal Auditors carried out reviews on the following areas:

- Customer relationship management
- Accounts receivable and credit control
- Sales transactions

The findings of their audits were tabled at the Audit Committee meetings for deliberation.

CONCLUSION

The Board, having received reasonable assurance from the CEO and CFO, is satisfied with the adequacy and effectiveness of the Group's risk management and internal control system which have been in place for the financial year under review and up to the date of approval of this Statement. There were no material internal control weaknesses which had resulted in material losses, uncertainties or contingencies that would require disclosure in this Annual Report.

This Statement is made in accordance with the resolution of the Board of Directors dated 19 September 2017.

Basis for Opinion

We conducted our audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing. Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the Group and the Company of the current period. Information Other than the Financial Statements and Auditors' Report Thereon

The directors of the Company are responsible for the other information. The other information comprises the directors' report (but does not include the financial statements of the Group and the Company and our auditors' report thereon), which we obtained prior to the date of this auditors' report, and the annual report, which is expected to be made available to us after that date.

Our opinion on the financial statements of the Group and the Company does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements of the Group and the Company, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements of the Group and the Company or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditors' report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

When we read the annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to the directors of the Company and request that a correction be made. If the directors refuse to make the correction, we shall take appropriate action considering our legal rights and obligations, to seek to have the uncorrected material misstatement appropriately brought to the attention of users for whom our auditors' report is prepared.

Responsibilities of the Directors for the Financial Statements

The directors of the Company are responsible for the preparation of financial statements of the Group and the Company that give a true and fair view in accordance with Malaysian Financial Reporting Standards, International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia. The directors are also responsible for such internal control as the directors determine is necessary to enable the preparation of financial statements of the Group and the Company that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements of the Group and the Company, the directors are responsible for assessing the Group's and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements of the Group and the Company as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:-

- Identify and assess the risks of material misstatement of the financial statements of the Group and the Company, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF

FoundPac Group Berhad (Incorporated In Malaysia) (Company No: 1165946-H)
(Cont'd)

- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's or the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements of the Group and the Company or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group or the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements of the Group and the Company, including the disclosures, and whether the financial statements of the Group and the Company represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the financial statements of the Group. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the financial statements of the Group and the Company of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Other Reporting Responsibilities

The supplementary information set out on page 84 is disclosed to meet the requirement of Bursa Malaysia Securities Berhad and is not part of the financial statements. The directors are responsible for the preparation of the supplementary information in accordance with Guidance on Special Matter No. 1 Determination of Realised and Unrealised Profits or Losses in the Context of Disclosures Pursuant to Bursa Malaysia Securities Berhad Listing Requirements, as issued by the Malaysian Institute of Accountants ("MIA Guidance") and the directive of Bursa Malaysia Securities Berhad. In our opinion, the supplementary information is prepared, in all material respects, in accordance with the MIA Guidance and the directive of Bursa Malaysia Securities Berhad.

(i) Amendments to MFRS 1 <i>First-time Adoption of Malaysian Financial Reporting Standards</i>	1 January 2018
(ii) Amendments to MFRS 12 <i>Disclosure of Interests in Other Entities</i>	1 January 2017
(iii) Amendments to MFRS 128 <i>Investments in Associates and Joint Ventures</i>	1 January 2018

Management foresees that the initial application of the above MFRSs will not have any significant impacts on the financial statements except as follows:-

MFRS 9 *Financial Instruments*

MFRS 9 *Financial Instruments*, which replaces MFRS 139 *Financial Instruments: Recognition and Measurement*, sets out the requirements for recognising and measuring financial instruments. The major changes introduced by MFRS 9 (that are relevant to the Group and the Company) relate to the classification and measurement of financial assets. Under MFRS 9, financial assets are classified as subsequently measured at amortised cost, fair value through other comprehensive income or fair value through profit or loss on the basis of both the business model within which they are held and their contractual cash flow characteristics. Management foresees that the adoption of these new classifications will not result in any significant changes in the existing measurement bases of financial assets of the Group and the Company.

2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

2.2 Basis of Consolidation

A subsidiary is an entity that is controlled by another entity. An investor controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

In February 2016, the Company issued new shares to acquire the entire issued and fully paid share capital of the subsidiaries. Such acquisition by share swap is a business combination of entities or businesses under common control whereby all the combining entities or businesses are ultimately controlled by the same parties both before and after the business combination, and that control is not transitory. Merger accounting has been applied to account for such business combination of entities or businesses under common control in the consolidated financial statements. In applying merger accounting:-

- (i) the financial statement items of the combining entities or businesses for the reporting period in which the combination occurs, and for any comparative periods disclosed, are included in the consolidated financial statements as if the combination had occurred from the date when the combining entities or businesses first came under the control of the controlling parties;
- (ii) the assets and liabilities of the combining entities or businesses are consolidated using the existing book values from the controlling parties' perspective;
- (iii) no amount is recognised as consideration for goodwill or bargain purchase gain at the time of combination, to the extent of the continuation of the controlling parties' interests; and
- (iv) the effects of all transactions between the combining entities or businesses, whether occurring before or after the combination, are eliminated in preparing the consolidated financial statements.

2.3 Property, Plant and Equipment

Property, plant and equipment are stated at cost or at valuation less accumulated depreciation and accumulated impairment losses, if any. The impairment policy is disclosed in Note 2.5.

Revaluations of land and buildings are made with sufficient regularity at an interval of not more than five years such that the carrying amounts of the assets do not differ materially from their fair values at the end of the reporting period.

A revaluation increase is recognised in other comprehensive income and accumulated in equity as revaluation surplus or recognised in profit or loss to the extent that the increase reverses a revaluation decrease of the same asset previously recognised in profit or loss. A revaluation decrease is recognised in profit or loss or recognised in other comprehensive income to the extent of any credit balance existing in the revaluation surplus in respect of the same asset.

Leasehold land and buildings are depreciated on a straight-line basis over the lease term of 44 years. Other property, plant and equipment are depreciated on a straight-line basis over the estimated useful lives of the assets using the following annual rates:-

Plant and machinery	20%
Office equipment, furniture and fittings	20% - 50%
Renovation	20%

The residual value, useful life and depreciation method of an asset are reviewed at least at the end of each reporting period and any changes in expectations from previous estimates are accounted for prospectively as changes in accounting estimates.

2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

2.4 Investments in Subsidiaries

As required by the Companies Act 2016, the Company prepares separate financial statements in addition to the consolidated financial statements. In the separate financial statements of the Company, investments in subsidiaries are stated at cost less impairment losses, if any. The impairment policy is disclosed in Note 2.5.

2.5 Impairment of Non-financial Assets

At the end of each reporting period, the Group and the Company assess whether there is any indication that a non-financial asset, other than inventories, may be impaired. If any such indication exists, the recoverable amount of the asset, being the higher of its fair value less costs of disposal and its value in use, is estimated. Any excess of the carrying amount of the asset over its recoverable amount represents an impairment loss and is recognised in profit or loss or, in respect of a revalued asset, treated as a revaluation decrease.

An impairment loss on an asset is reversed if there has been a change in the estimates used to determine the recoverable amount and it is reversed only to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, had no impairment loss been recognised. The reversal is recognised in profit or loss or, in respect of a revalued asset, treated as a revaluation increase.

2.6 Inventories

Inventories of materials and goods are valued at the lower of cost (determined principally on the weighted average basis) and net realisable value. Cost consists of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and costs necessary to make the sale.

2.7 Financial Assets

Financial assets of the Group and the Company consist of receivables and cash and cash equivalents.

Recognition and Measurement

A financial asset is recognised in the statement of financial position when, and only when, the Group or the Company becomes a party to the contractual provisions of the financial instrument. A financial asset is initially recognised at fair value plus directly attributable transaction costs. After initial recognition, the financial asset is measured at amortised cost using the effective interest method. Any gain or loss is recognised in profit or loss when the financial asset is derecognised or impaired as well as through the amortisation process.

A financial asset is derecognised when, and only when, the contractual rights to the cash flows from the financial asset have expired or all the risks and rewards of ownership have been substantially transferred.

Impairment

At the end of each reporting period, the Group and the Company assess whether there is any objective evidence that a financial asset or group of financial assets is impaired. If any such evidence exists, the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted using the asset's original effective interest rate. The asset's carrying amount is reduced through the use of an allowance account and the impairment loss is recognised in profit or loss. The gross carrying amount and the associated allowance are written off when there is no realistic prospect of future recovery.

If, in a subsequent period, the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed to the extent that the increased carrying amount does not exceed what the amortised cost would have been had no impairment loss been recognised at the reversal date. The reversal is recognised in profit or loss.

2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

2.8 Financial Liabilities

Financial liabilities of the Group and the Company consist of payables.

Recognition and Measurement

A financial liability is recognised in the statement of financial position when, and only when, the Group or the Company becomes a party to the contractual provisions of the financial instrument. A financial liability is initially recognised at fair value less directly attributable transaction costs. After initial recognition, the financial liability is measured at amortised cost using the effective interest method. Any gain or loss is recognised in profit or loss when the financial liability is derecognised as well as through the amortisation process.

A financial liability is derecognised when, and only when, the obligation specified in the contract is discharged or cancelled or expires.

2.9 Foreign Currency Transactions and Translation

The consolidated financial statements and separate financial statements of the Company are presented in Ringgit Malaysia, which is also the Company's functional currency, being the currency of the primary economic environment in which the entity operates. Items included in the financial statements of each individual entity within the Group are measured using the individual entity's own functional currency.

A foreign currency transaction is recorded in the functional currency using the exchange rate at transaction date. At the end of the reporting period, foreign currency monetary items are translated into the functional currency using the closing rate. Foreign currency non-monetary items measured at cost are translated using the exchange rate at transaction date whereas those measured at fair value are translated using the exchange rate at valuation date. Exchange differences arising from the settlement or translation of monetary items are recognised in profit or loss. Any exchange component of the gain or loss on a non-monetary item is recognised on the same basis as that of the gain or loss, i.e. in profit or loss or in other comprehensive income.

2.10 Share Capital

Ordinary shares are classified as equity. Transaction costs that relate to the issue of new shares are accounted for as a deduction from equity.

Dividends on shares declared and unpaid at the end of the reporting period are recognised as a liability whereas dividends proposed or declared after the reporting period are disclosed in the notes to the financial statements.

2.11 Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Group and the Company use valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs. The valuation techniques used include the following:-

- (i) Market approach - which uses prices and other relevant information generated by market transactions involving identical or comparable (i.e. similar) assets, liabilities or a group of assets and liabilities.
- (ii) Cost approach - which reflects the amount that would be required currently to replace the service capacity of an asset.
- (iii) Income approach - which converts future amounts (e.g. cash flows or income and expenses) to a single current (i.e. discounted) amount.

NOTES TO THE FINANCIAL STATEMENTS

(Cont'd)

2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

2.11 Fair Value Measurement (Cont'd)

The inputs to valuation techniques used to measure fair value are categorised into the following levels of fair value hierarchy:-

- (i) Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- (ii) Level 2 - inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- (iii) Level 3 - unobservable inputs for the asset or liability.

Any transfers between the levels of fair value hierarchy are deemed to have occurred at the end of the reporting period.

Non-financial Assets

The fair values of land and buildings are measured using the market comparison approach. Under this approach, the fair values are derived from observable market data such as prices per square foot for comparable properties in similar locations (i.e. Level 2).

Financial Assets and Financial Liabilities

The carrying amounts of receivables, cash and cash equivalents and payables which are short-term in nature or repayable on demand are reasonable approximations of fair values.

2.12 Income Recognition

Income from the sale of goods is recognised when the significant risks and rewards of ownership have been transferred to the buyer.

Dividend income is recognised when the shareholder's right to receive payment is established.

Interest income is recognised using the effective interest method.

2.13 Employee Benefits

Short-term Employee Benefits

Short-term employee benefits such as wages, salaries, bonuses and social security contributions are recognised in profit or loss in the period in which the associated services are rendered by the employee.

Defined Contribution Plans

As required by law, employers in Malaysia make contributions to the statutory pension scheme, Employees Provident Fund ("EPF"). Contributions to defined contribution plans are recognised in profit or loss in the period in which the associated services are rendered by the employee.

2.14 Income Taxes

Income taxes for the year comprise current tax and deferred tax.

Current tax represents the expected amount of income taxes payable in respect of the taxable profit for the year and is measured using the tax rates that have been enacted or substantively enacted by the end of the reporting period.

NOTES TO THE FINANCIAL STATEMENTS

for the financial year ended 30 June 2017

(Cont'd)

2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

2.14 Income Taxes (Cont'd)

Deferred tax is provided for under the liability method in respect of all temporary differences between the carrying amount of an asset or liability and its tax base except for those temporary differences associated with goodwill or the initial recognition of an asset or liability in a transaction which is not a business combination and affects neither accounting nor taxable results at the time of the transaction.

A deferred tax liability is recognised for all taxable temporary differences whereas a deferred tax asset is recognised for all deductible temporary differences, unused tax losses and unused tax credits to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences, unused tax losses and unused tax credits can be utilised. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on the tax rates that have been enacted or substantively enacted by the end of the reporting period.

2.15 Cash and Cash Equivalents

Cash and cash equivalents comprise cash on hand, demand deposits, term deposits that are withdrawable on demand and short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. For the purpose of statement of cash flows, cash and cash equivalents are presented net of bank overdrafts and pledged deposits.

3. Judgements And Estimation Uncertainty

Judgements Made in Applying Accounting Policies

In the process of applying the accounting policies of the Group and the Company, management is not aware of any judgements, apart from those involving estimations, that can significantly affect the amounts recognised in the financial statements.

Sources of Estimation Uncertainty

The key assumptions about the future, and other major sources of estimation uncertainty at the end of the reporting period, that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:-

Allowance for inventories

Reviews are made periodically by management on inventories for excess inventories, obsolescence and decline in net realisable value below cost. These reviews require the use of judgements and estimates. Possible changes in these estimates may result in revisions to the valuation of inventories. The carrying amounts of inventories are disclosed in Note 6.

Impairment of loans and receivables

The Group and the Company make allowance for impairment based on an assessment of the recoverability of loans and receivables. Allowance is applied to loans and receivables when there is objective evidence that the balances may not be recoverable. Management specifically analyses historical bad debts, customer concentration, customer creditworthiness, current economic trends and changes in customer payment terms when making a judgement to evaluate the adequacy of the allowance for impairment. Where expectations are different from previous estimates, the difference will impact on the carrying amounts of loans and receivables as disclosed in Note 7.

20. FINANCIAL RISK MANAGEMENT

The activities of the Group expose it to certain financial risks, including credit risk, liquidity risk and currency risk. The overall financial risk management objective of the Group is to ensure that adequate financial resources are available for business development whilst minimising the potential adverse impacts of financial risks on its financial position, performance and cash flows.

The aforementioned financial risk management objective and its related policies and processes explained below have remained unchanged from the previous financial year.

Credit Risk

The Group's exposure to credit risk arises mainly from receivables and deposits placed with financial institutions. The maximum credit risk exposure of these financial assets is best represented by their respective carrying amounts in the statement of financial position.

As the Group only deals with reputable financial institutions, the credit risk associated with deposits placed with them is minimal. The Group manages its credit risk exposure of receivables by assessing counterparties' financial standings on an ongoing basis, setting and monitoring counterparties' limits and credit terms.

Liquidity Risk

The Group's exposure to liquidity risk relates to its ability to meet obligations associated with financial liabilities as and when they fall due. The remaining contractual maturities of financial liabilities are disclosed in their respective notes.

The Group practises prudent liquidity risk management to minimise the mismatch of financial assets and liabilities whilst maintaining sufficient cash and the availability of funding through standby credit facilities.

Currency Risk

The Group's exposure to currency risk arises mainly from transactions entered into in currencies other than its functional currency, i.e. Ringgit Malaysia ("RM"). The major foreign currency transacted is US Dollar ("USD").

The Group observes the movements in exchange rates and acts accordingly to minimise its exposure to currency risk. Where necessary, the Group enters into derivative contracts to hedge the exposure. Such exposure is also partly mitigated in the following ways:-

- (i) The Group's foreign currency sales and purchases provide a natural hedge against fluctuations in foreign currencies.
- (ii) The Group maintains part of its cash and cash equivalents in foreign currency accounts to meet future obligations in foreign currencies.

Based on a symmetric basis which uses the foreign currency as a stable denominator, the following table demonstrates the sensitivity of profit or loss to changes in exchange rates that were reasonably possible at the end of the reporting period, with all other variables held constant:-

	The Group	
	Increase/ (Decrease) in Profit 2017 RM	Increase/ (Decrease) in Profit 2016 RM
Appreciation of USD against RM by 10%	625,296	723,769
Depreciation of USD against RM by 10%	<u>(625,296)</u>	<u>(723,769)</u>

21. CAPITAL MANAGEMENT

The overall capital management objective of the Group is to safeguard its ability to continue as a going concern so as to provide fair returns to owners and benefits to other stakeholders. In order to meet this objective, the Group always strives to maintain an optimal capital structure to reduce the cost of capital and sustain its business development.

The Group considers its total equity and total loans and borrowings to be the key components of its capital structure and may, from time to time, adjust the dividend payouts, issue new shares, sell assets, raise or redeem debts, where necessary, to maintain an optimal capital structure. The Group monitors capital using a debt-to-equity ratio, which is calculated as total loans and borrowings divided by total equity.

The aforementioned capital management objective, policies and processes have remained unchanged from the previous financial year.
