Part B - Additional Information Required by the ACE Market Listing Requirements of Bursa Securities

B1. Review of Group's Performance

Comparison with prior year corresponding quarter results

The Group's revenue of RM75.82 million for the current financial quarter were 58.99% or RM28.13 million higher than that of prior year corresponding quarter. The increase was primarily attributable to the higher revenue recognised for production line systems coupled with the increase in demand from existing customers, and a notable increase in provision of parts and demand for on-site services, installation and commissioning revenue from existing customers during the 3rd quarter ended 30 September 2020.

The Group has recorded a higher gross profit ("GP") of RM34.84 million and higher gross profit margin ("GP margin") of 45.94% as compared to RM16.49 million and 34.58% respectively in the prior year corresponding quarter. The increase was in line with the Group's continued efforts to drive margin improvement of our business.

The Group's profit before tax ("PBT") for the current financial quarter was RM23.51 million or 31.01% of revenue, an increase of RM10.46 million or 80.15% as compared to the prior year corresponding quarter. The increase reflected from the higher revenues and GP were partially offset by the increased research and development expenses, unrealised losses on foreign exchange and the provision of employees' incentive expenses, in line with the corporate proposal of the Long Term Incentive Plan ("Proposed LTIP") that the Group have announced last month, as well as the lower other income generated for the current quarter of RM1.66 million as compared to prior year corresponding quarter.

Comparison with prior year cumulative quarter results

The Group's cumulative revenue has increased by RM27.36 million or 17.38% from RM157.42 million in 2019 to RM184.78 million in 2020. This is driven by the demands of modification and upgrade of existing solar manufacturing lines and production line systems' repeat order received in 2nd half of 2019 as scheduled for delivery in the 2nd half of 2020 and better order intake of parts and services arising from the existing customers' continued capital investment along with positive development of demand for energy storage and semiconductor industry.

The Group's PBT has increased significantly by RM23.54 million or 64.32% from RM36.60 million in 2019 to RM60.14 million in 2020. This was the result of higher revenue and GP compared with prior year, as well as the increase in other income arising from dividend income from the placement of short term funds and partially offset by increase in administrative and marketing expenses for research and development expenses, unrealised losses on foreign exchange and provision of employees' incentive expenses.

B2. Comparison with Immediate Preceding Quarter's Results

The Group's revenue for the current financial quarter ended 30 September 2020 increased by RM19.60 million or 34.86% to RM75.82 million as compared to RM56.22 million in the preceding financial quarter ended 30 June 2020. The Group's positive third quarter result is driven by higher revenue recognised from production line systems keeping in line with higher percentage of completion and to some extend, an increase in demand of provision of parts and services.

Despite the large increase in GP of 59.74% or RM13.03 million, the PBT of the Group for the current financial quarter recorded an increase of 31.86% or RM5.68 million, amounting to RM23.51 million. This is mainly attributable to the increase in administrative and marketing expenses from the provision of employees' incentive expenses, research and development expenses and unrealised losses on foreign exchange, offset by the lower impairment loss on contract assets.

The Group continues to focus on positioning our production capacity and delivering equipment and services to our customers while maintaining an intense focus on cost control, which will ensure the business remains well positioned to deliver tangible results and earnings expansion in 2021 and beyond.

As of 13 November 2020, the Group's order book stood at RM266.90 million, which is expected to last until the second half of 2021.

The overall effective tax rate for the financial period of the Group was lower than the statutory tax rate of 24% as the subsidiary, Greatech Integration (M) Sdn. Bhd., was granted pioneer status by Ministry of International Trade and Industry of Malaysia under the Promotion of Investments Act, 1986 on 29 March 2013, for a period of five (5) years up to 28 March 2018, which was subsequently extended for another five (5) years to 28 March 2023. As such, its statutory income during this period is exempted from income tax.

Foreign withholding tax is related to withholding tax liability from sales of production line systems and provision of engineering services to a customer in certain jurisdiction. Due to complexity of the tax law, significant judgement is required in evaluating the tax positions, including uncertainties. There is no assurance of refundability. Thus, the Group has decided to expense the withholding tax to the profit or loss.
