NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL REPORT

Part B - Additional Information Required by the Main Market Listing Requirements of Bursa Securities

B1. Review of Group's Performance

Comparison with prior year corresponding quarter results

The Group's revenue of RM102.16 million for the current financial quarter were 7.38% or RM7.01 million higher than that of prior year corresponding quarter. Revenue from the Single Automated Equipment ("SAE") and Provision of Parts & Services ("PSS") increased RM11.32 million and RM0.68 million respectively in current financial quarter. The increased of both SAE and PSS revenue was primarily from the revenue generated in electric vehicle ("EV") energy storage driven by several orders secured in 3rd quarter 2021 for invoicing in the early of 2022 and increased sales of parts and services. This was offset by a RM4.99 million decrease in revenue generated from Production Line Systems ("PLS") due to the lengthening global supply chain which negatively impact the cycle time of the projects.

The Group has recorded a lower gross profit ("GP") and GP margin of RM35.21 million and 34.47% respectively, as compared to RM49.38 million and 51.90% respectively in the prior year corresponding quarter. The normalised GP margin without the net warranty impact was 36.27% and 46.41% respectively for current financial quarter and prior year corresponding quarter. The current financial quarter's margin was mainly impacted by (i) increase in project expenditures as the new projects secured were in the fabrication and assembly stage; (ii) increase in subcontract charges to ensure timely delivery of projects. COVID-19 new variant related operational inefficiencies arising from closed contact quarantine measures to minimise exposure has also reduced manpower capacity and added subcontract cost to projects to meet delivery; and (iii) prior year corresponding quarter also benefited from favourable GP margin mix realised from installation and commissioning revenue.

The Group's profit before tax ("PBT") for the current financial quarter has decreased by RM17.72 million or 37.69% as compared to the prior year corresponding quarter. The normalised PBT margin without the net warranty impact was 30.48% and 43.92% respectively for current financial quarter and prior year corresponding quarter. The decrease in PBT was primarily contributed by the decline of GP amounting to RM14.17 million, share grant expenses of RM0.99 million and lesser net foreign exchange gain of RM3.09 million.

B2. Comparison with Immediate Preceding Quarter's Results

The Group's revenue for the current financial quarter ended 31 March 2022 has increased by RM26.77 million or 35.51% as compare to the preceding financial quarter ended 31 December 2021. The revenue increase was driven by the progress of new projects secured in late 2021 in comparison to lower revenue recognised in last quarter where new projects secured was yet to reach the milestone for revenue recognition.

Despite the increase of revenue, the Group's gross profit ("GP") decreased by RM1.97 million or 5.29% as compared to preceding financial quarter. The GP margin has also reduced from 49.32% in preceding financial quarter to 34.47% in current financial quarter. The normalised GP margin without the net warranty impact was 36.27% and 39.73% respectively for current financial quarter and immediate preceding quarter. The margin declined was primarily due to (i) increase in project expenditures as the new projects secured were in the fabrication and assembly stage; and (ii) increase in subcontract charges to ensure timely delivery of projects. COVID-19 related operational inefficiencies arising from closed contact quarantine measures has also reduced manpower capacity and added subcontract cost to projects.

The profit before tax ("PBT") of the Group for the current financial quarter was decreased by RM0.97 million as compared to preceding financial quarter. The normalised PBT margin without the net warranty impact was 30.48% and 30.55% respectively for current financial quarter and prior year corresponding quarter.

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL REPORT

B3. Commentary on Prospects

Coming off a strong year in 2021, the Group business continued to be influenced by persistent supply chain bottlenecks, which not only lead to rises in the cost of materials, components and freight, but also impacted the project execution and production efficiencies. The Group believes that as the conditions of supply chain improves, it will enable execution and orders conversion of ongoing customer, which will accelerate our growth in revenue throughout 2022.

Despite geopolitical tensions, persistent COVID-19 pandemic with renewed lockdowns in Shanghai, China, global supply chain constraint and increasingly inflationary environment, the demand for environmental and sustainability related solutions continued to benefit positively from the increased in investment driven by technological change in e-mobility and energy industry. The group anticipate that supply-chain constraint will continue to pose pressure in our industries. The Group is working closely with its suppliers to address these challenges and remain focused on executing its strategy for long-term profitable growth.

As of 9 May 2022, the Group's order book stood at RM467.00 million, which is expected to last until first half of 2023.

B4. Profit Forecast

The Group did not issue any profit forecast during the financial quarter under review.

B5. Status of Corporate Proposals

There were no corporate proposals announced but not completed for the current financial quarter under review.

Effective tax rate	1.24%	0.75%	1.24%	0.75%

The overall effective tax rate for the financial period of the Group was lower than the statutory tax rate of 24% as the subsidiary, Greatech Integration (M) Sdn. Bhd., was granted pioneer status by Ministry of International Trade and Industry of Malaysia under the Promotion of Investments Act, 1986 on 29 March 2013, for a period of five (5) years up to 28 March 2018, which was subsequently extended for another five (5) years to 28 March 2023. As such, its statutory income during this period is exempted from income tax.

Withholding tax expense is related to foreign withholding tax liability from sales of production line systems and provision of engineering services to a customer in certain jurisdiction. Due to complexity of the tax law, significant judgement is required in evaluating the tax positions, including uncertainties. There is no assurance of refundability. Thus, the Group has decided to expense the withholding tax to the statement of profit or loss and other comprehensive income.

B7. Use of Proceeds from the Initial Public Offering (“IPO”)

The gross proceeds of RM73.05 million raised from the Public Issue and status of utilisation as at 31 March 2022 is disclosed in the following manner:
