The Group reported a higher revenue by RM24,97 million or 39.87%, standing at RM87.61 million as compared to the preceding year quarter of RM62.63 million. This increase in revenue was driven by improved average egg selling prices for the current quarter under review as compare to Q4 2020.

As the result, the Group registered a profit before taxation of RM3.78 million in the current quarter as compared to the preceding quarter, which was a loss before taxation of RM7.81 million, showing an improvement by approximately RM11.58 million or 148.36%. The improved operating result helped to drive a return to modest profitability during the fourth quarter despite the impacts of higher feed costs, transportation and packaging.

B2. Comparison with the Preceding Quarter's Results

	Current Quarter	Immediate Preceding Quarter	
	31.12.2021	30.9.2021	Changes
	RM'000	RM'000	(%)

Profit/(Loss) After Taxation Attributable to Owners of the Company	5,464	(5,711)	195.67

B2. Comparison with the Preceding Quarter's Results (Cont'd)

The Group recorded an increase of RM7.23 million or 8.99% in the Group's revenue of RM87.61 million for the current quarter under review compared to RM80.38 million in Q3 2021. The increase in revenue was mainly due to the improved average selling prices of eggs and improved number of eggs sold for the current quarter under review as compare to Q3 2021.

As the result, the Group recorded a profit before taxation of RM3.78 million for the current quarter under review compare to a loss before taxation of RM5.71 million during the immediate preceding quarter, indicating an improvement of RM9.49 million or 166.11%. The improved result was primarily due to the increased average selling prices of eggs as the market demand of eggs continued to improve steadily, resulting in better overall egg supply and demand balance.

B3. Commentary on Current Year Prospect

As the country entered into the economic recovery after the pandemic-driven lockdowns during the past 18 months, the market demand for eggs have steadily improved, resulting in better overall eggs supply and demand balance and thus, improved average selling prices of eggs.

However, the sudden imposition of price control for eggs by the government starting from Dec 2011 till June 2022 under the Malaysian Family Maximum Price Scheme is likely to inflict substantial impact to the performance of the company and the industry. Nevertheless, the government's intervention through the provision of subsidies will help to ease the burden following an increase in the feed costs, logistics, labours and other operating expenses.

We expect the costs of raw materials (i.e. corns, soybean meals) will continue to remain volatile in the coming months given the ongoing disruptions related to pandemic, weather fluctuation and geopolitical issues. Manpower shortage, increasing farm construction and production costs will continue to be the big challenges for this industry.

In spite of the challenges, the management will remain focused on what we can control by managing our costs and running efficient operations in order to meet the needs of our customers.
