B. ADDITIONAL INFORMATION REQUIRED BY THE LISTING REQUIREMENTS

B1. Analysis of performance

Current guarter's performance against the guarter ended 30 June 2018

The Group's revenue for the current quarter ended 30 June 2019 decreased by approximately RM1.6 million (2.0%) compared to the preceding year corresponding quarter.

The Group's subsidiaries in Taiwan and Malaysia recorded a lower revenue compared to the preceding year corresponding quarter but this is mitigated by a better performance of the Group's subsidiary in Singapore. Despite a lower revenue from our subsidiary in Taiwan, the guidance provided by one of our customers seems to indicate that the worst may be over and that the demand in the second half of 2019 will pick up significantly. The customer further added that this could have been due to new orders of its advanced high-performance chips, particularly as countries roll out ultra-fast fifth generation wireless networks.

The Group's profit before tax ("PBT") of RM23.1 million for the current quarter was RM3.6 million or 18.4% higher than the corresponding quarter's RM19.5 million. The higher profit was mainly due to improved performances by the Group's subsidiary in Singapore and better profit margin resulting from the continual efforts to improve our efficiency across the Group.

The Group recorded foreign currency exchange loss of RM0.3 million in current quarter as compared to foreign exchange gain of RM1.5 million in the preceding year corresponding quarter. If we were to exclude the foreign currency exchange impact, the current quarter's performance would have been 30% better than the preceding year corresponding quarter.

Current 6 months period's performance against the 6 months period ended 30 June 2018

The Group's revenue of RM164.0 million for the current period ended 30 June 2019 was RM11.3 million (7.4%) higher than that achieved in the preceding year corresponding period. The improvement was mainly due to better performances from the Group's subsidiaries in Malaysia, Singapore and the Philippines. Year-to-date revenue during the first half of 2019 from those three subsidiaries rose 22.6%, 21.1% and 2.0% respectively compared to the first half of 2018 due to the positive growth in their respective businesses.

Against the same period last year, the PBT for the Group jumped by RM15.1 million (49.5%) as a result of improved revenue and vigilance in cost management. This is despite the foreign currency exchange loss of RM0.3 million recorded in the current period ended 30 June 2019 as compared to foreign currency exchange gain of RM0.9 million in the preceding year corresponding period.

If we were to exclude the foreign currency exchange impact, the current year-to-date PBT would have been RM45.9 million or 55.1% better than the preceding year corresponding period instead of the 49.5% as mentioned above.

B2. Comparison with immediate preceding quarter

	2nd Quarter 30 Jun 2019	1st Quarter 31 Mar 2019	
	RM'000	RM'000	
Revenue	80,144	83,830	
Profit before tax	23,103	22,549	
Profit after tax	17,823	16,343	
Profit attributable to owners of the Company	16,518	15,404	

The Group's revenue was 4.4% or approximately RM3.7 million lower during the current quarter as compared to the immediate preceding quarter. The lower revenue from the Group's subsidiaries in Taiwan, Malaysia and the Philippines was mitigated from the improved performance of the Group's subsidiary in Singapore. Our major customer in Taiwan indicated that they have passed the bottom of the cycle of their business and should see the demand increase in the second half of 2019. According to Morgan Stanley, orders for cryptomining gear are expected to help our customer's third quarter sales while the typical year-end ramp up of new smartphone manufacturing and a new chip-product cycle from their customers could also buoy the top line. To that end, we hope that we will also benefit from our customers' ramp up of production and see increased sales in the second half of the year.

The Group's improved unaudited profit before tax for the current quarter was partly attributable to our continual efforts in improving our production processes leading to better cost management.

B3. Prospects

The Group recorded a remarkable first half results with a 49.5% increase in its PBT compared to the preceding year corresponding period mainly attributable to the positive growth in both our semi-conductor and oil and gas businesses. Nevertheless, the Group anticipates that the overall business conditions for the remaining 6 months period in 2019 will continue to be challenging amidst global uncertainties where US-China trade war is chilling business investment, confidence and trade flows across the world. Although the general outlook for the semiconductor industry is somewhat tepid, the recent positive development following the settlement of a long outstanding dispute by major players in this sector had somewhat boosted the outlook. Therefore, moving forward, we believe it will be positive for us.

As for the oil and gas industry, we noticed that the number of enquiries had picked up and have been transferred into orders. The improved performance of our oil and gas business augurs well for the realization of our projected 2019 revenue. Having said that, enforced capital discipline, portfolio realignments and productivity efficiencies, the yet unresolved trade tensions all remain a key source of risk to the current positive outlook.

While the Group anticipates that the overall business conditions in the remaining two quarters of the current financial year to remain challenging, we are cautiously optimistic that our performance for the remaining months will be satisfactory.

We will continue to be vigilant in our cost management and continually explore ways to improve on our production efficiency. Our priority will be to continue to focus our attention on the quality of our services and efficiencies so as to maintain our competitiveness.

B4. Variance in profit forecast

Not applicable as no profit forecast or profit guarantee has been announced or disclosed in a public document previously.

B5. Taxation

	Current Quarter 30 Jun 2019	Current Year-to-date 30 Jun 2019	
	RM'000	RM'000	
Income tax	4,798	11,114	
Deferred tax	(32)	(142)	
Withholding tax	514	514	
	5,280	11,486	

The Group's effective tax rate for the period under review was higher than the statutory tax rate principally due to losses of certain subsidiaries which cannot be set off against taxable profits made by other subsidiaries and the withholding tax charged on dividend income from Taiwan.

B6. Status of corporate proposals

There were no corporate proposals that were announced but not completed.
